NEXT GENERATION KEYLESS ACCESS CONTROL

SALTO SYSTEMS ONE JUMP AHEAD

Since 2001, SALTO Systems has been delivering state-of-the-art wire-free and keyless electronic access control solutions. SALTO is driven by continuous improvement and is committed to developing the most technologically-advanced and flexible electronic locking solutions for any kind of door and user need. SALTO has established itself as a global market leader in electronic access control solutions.

SALTO continues to grow the value of its brand, and today, SALTO is synonymous with innovative solutions that set new standards in security, manageability, flexibility and design that bring real-world benefits.

The pioneering SALTO Virtual Network SVN data-on-card and technology platforms provide stand-alone, smart locking solutions that continue to set SALTO apart. More recently, the company's technological expertise has brought SALTO to leading positions in both cloud-based access control technology and mobile access solutions.

Having revolutionized access control in a vast number of industries and applications – from office, education, healthcare, transport and commercial buildings to business, hospitality and residential – SALTO continues to deliver industry-leading electronic locking solutions to markets across the globe.

CUSTOMER SOLUTIONS

SALTO access control solutions are in use worldwide in a never-ending range of challenging and unique applications and facilities.

Core markets include commercial and manufacturing environments, public institutions, healthcare facilities of all types, educational settings and campuses, transport installations, leisure facilities, as well as the hospitality sector. SALTO solutions cover so many projects in so many markets due to the scalability of the system -- smaller projects can be implemented and then as required easily expand to larger, even transnational solutions.

COMMERCIAL

SALTO solutions are in use around the world in many types of commercial buildings, where they provide security, access control and staff and workforce management.

- Office & Industrial buildings
- Education
- Healthcare
- Transport
- Government
- Leisure & Entertainment
- Hospitality

BUSINESS

SALTO solutions make access control a simple and secure solution for business access to manage keys, users and doors across multiple locations to ensure that only the right people get through.

- Retail
- Working spaces

RESIDENTIAL

Smart locks replace the traditional home door key with an electronic system that allows you to use your smartphone to control your door, your guests and your home.

- Home
- Rental properties

SECURE & CONTROL VIRTUALLY EVERY ACCESS POINT

Inspiration, dedication and passion have led SALTO to become one of the world's top five manufacturers of electronic access control systems in little more than 10 years.

THE BENEFITS OF A SALTO SOLUTION

At SALTO, our goal is to always give our customers the products they need to meet and surpass the challenges they face. It's why we go the extra mile to design and manufacture innovative solutions using the latest technologies in order to meet requirements both now and in the future – whatever the market.

SALTO brings you more

Security

Provide seamless keyless experiences, with patented and fast read and write data-on-card technology, expertise in applying wireless electronic locking solutions in the most secure way.

SALTO brings you more

Design

Complete hardware and software platform, which fits virtually any door and any access point and suits all vertical markets.

- ✓ Compatible with most common RFID technologies.
- ✓ Compatible with leading physical security information management systems (PSIM).
- ✓ Reliable products due to extensive in-house R&D, in-house production and in-house quality management.

- ✓ Open architecture and standardized interfaces allow seamless integration.
- ✓ Future-proof scalability.
- ✓ Longest in-depth knowledge of virtual network technology.
- ✓ Integration of legacy credentials, and compatibility with other systems through multi-application.
- ✓ Market-driven development.

SALTO brings you greater **Flexibility**

Mechanical key management is costly, unsecure and a hassle. Upfront costs of replacing master keys, drilling out locks, updating all affected users' keys, plus indirect costs like maintenance team productivity can be substantial.

SALTO brings you better **Manageability**

Effective and time-saving management of all online, offline and wireless access points and applications in one software package.

- ✓ Cost-saving maintenance of door components.
- ✓ Maximized ROI through buy-once philosophy.
- ✓ Upfront investment is substantially less than with traditional wired access control solutions.
- ✓ SALTO hardware is designed to cost-effectively meet international wireless technology standards.
- ✓ Different applications apart from doors can be included.
- ✓ Software structured around users and doors, easy navigation, user-friendly management.
- ✓ Multi-application allows one credential to be used for different applications.
- ✓ Update the access plan quickly, easily and securely.

WITH SALTO, SAY GOODBYE TO MECHANICAL KEYS

THE ACCESS CONTROL SOLUTION YOU THOUGHT YOU'D NEVER FIND

At SALTO, our goal is to always give our customers the products they need to meet and surpass the challenges they face. It's why we go the extra mile to design and manufacture innovative access control solutions using the latest technologies in order to meet users' needs and any type of building requirements both now and in the future—whatever the market.

SALTO Systems revolutionized access control with the introduction of the SALTO Virtual Network SVN data-on-card technology and the battery-operated wire-free electronic lock range in 2001. For nearly 20 years SALTO has been synonymous with innovative solutions, including stand-alone, cloud-based and mobile applications, that set new standards in security, manageability, flexibility and design that bring real-world benefits to virtually any type of door. SALTO is widely recognized as a global market leader in electronic access control solutions across a broad range of industries and applications.

Today, SALTO leads access control innovation with the development of and continued investment in SALTO SPACE networked wire-free battery-powered locks and SALTO KS cloud-based technology platforms.

SALTO SPACE

**WIRE-FREE SMART ACCESS
CONTROL TECHNOLOGY
PLATFORM.**

SALTO's SPACE networked electronic locking access control platform brings a new level of powerful flexibility to access control so that users can order the functionalities they most need and upgrade accordingly as a system and needs grow. SALTO SPACE access control management platform offers a modern, user-centered interface web-based software for varying skills, capabilities, and security levels. Mobile access control adds convenience and flexibility without sacrificing security.

SALTO KS

**CLOUD-BASED ACCESS
CONTROL, ON-THE-GO AND IN
REAL-TIME.**

SALTO KS - Keys as a Service - provides a flexible, cloud-based access control management system that requires no software installation or the added expense of a fully-wired electronic product. All that is needed is an online device with an Internet connection.

SALTO SPACE

WIRE-FREE SMART ACCESS CONTROL TECHNOLOGY PLATFORM

SALTO's SPACE access control technology platform is designed to give end users ultimate freedom of choice regarding system layout, type and number of access points as well as level of security. In addition, SALTO easily adapts to changing requirements and can deliver scalability no matter what the project size.

Having one of the broadest product portfolios in access control worldwide, SALTO SPACE can fulfill virtually every technical and functional requirement. Thus, access control solutions by SALTO can encompass almost every access point in a building and its perimeter.

PROACCESS SPACE MANAGEMENT SOFTWARE:

Intuitive user-centred web-based software interface that makes it simple and secure to incorporate access control for any type of building size or user needs. It's a powerful and flexible software allowing each system operator to set up their own preferences: capabilities and security level, language settings and others.

SALTO's SPACE platform offers several ways to integrate with third-party systems. This includes interfaces and APIs for connecting SALTO smart lock technology to video surveillance, vehicle access, biometrics, time & attendance, escape door control systems, intrusion alarm, and many more.

DIFFERENT BUILDING TYPES HAVE DIFFERENT SECURITY NEEDS.

SALTO offers a wide range of technologies and system layouts. From a simple self-programmable system that needs no computer to manage it, through a highly capable mid-range ROM system up to the data-on-card SALTO Virtual Network (SVN) system and the wireless online (BLUEnet) system, SALTO has what end users need. Upgrade anytime - whenever required - and even mix and match several technologies such as SVN and Wireless.

ROM SCALABLE SYSTEM RFID TECHNOLOGY

YOU CHOOSE THE LEVEL OF SECURITY CONTROL YOU NEED.

SALTO Systems' unique new networked escutcheons and cylinders can be used for an extensive range of access control applications. It's the first RFID system that can be upgraded at any time.

It provides all the benefits of a stand-alone access control system in a compact, cost effective package for user, key and door management for small installations.

Through an easy to use software you can create keys, users and doors, user groups and zones, and set time periods and opening modes that instruct the door to lock or unlock automatically as needed.

SALTO has the options you need to find the right solution for the present and growing with you in the future.

MAIN FEATURES AND BENEFITS

Computer managed, allowing for the configuration of the electronic escutcheons, monitoring of access flows, recording access, adding and removing users and setting up the user access profile.

Simple & secure system for key management. The system can manage up to 16,000 users and 65,000 doors.

7 different opening modes to suit your needs (standard, free passage ability, free passage with automatic locking, automatic opening, toggle and timed toggle).

30 time zones, 4 calendars and 680 door events held in the electronic escutcheon/electronic cylinder memory.

Scalability, flexibility and functionality. The system can be upgraded simply by using a Portable Programming Device (PPD), making it possible to upgrade to a data-on-card SVN system when your needs change.

Multi-application through the contactless carrier enables use of existing contactless RFID smart cards.

HOW IT WORKS

Stand-alone electronic lock:

Any changes you make such as: adding new users, deleting users, updating the escutcheons, electronic cylinders or wall reader, or collecting the event audit trail are done through its ProAccess ROM software and contactless PPD.

Contactless Portable Programming Device (PPD)

Each time you connect the PPD to an escutcheon, electronic cylinder or wall reader, the event audit trail and battery status will be automatically downloaded.

ProAccess ROM functions:

- Add or delete users
- Set up user profiles (calendars, shifts...)
- Change escutcheon opening modes
- Event audit trail
- Stand-alone locks battery status remote report

SVN

STAND-ALONE
NETWORKED

SALTO VIRTUAL NETWORK (SVN) DATA-ON-CARD TECHNOLOGY

STAND-ALONE NETWORKED LOCKING SYSTEM

The SALTO VIRTUAL NETWORK (SVN) is an easy-to-use system that integrates all physical security needs through networked, stand-alone, battery-operated smart locks. The SVN platform provides the most up-to-date user access information for virtually all doors in a facility.

This innovative, wire-free technology allows stand-alone electronic escutcheons to read, store and write information via its operating smart cards. This data is captured from the user's key at wireless networked electronic locks / cylinders or online IP SVN access points located at strategic points around the building.

The "updating access points" download and revalidate user-related access plan information that is then used to permit or deny access.

Manage and secure access control for all of your facilities right from your desk. Check battery status (to optimize maintenance) and user event information in just a few easy steps.

MAIN FEATURES AND BENEFITS

Cost-effective, quick and easy installation to upgrade the traditional mechanical key-operated door locks without having to replace the door and with no hardwiring required.

Enhances security for any type of doors, eliminating key management issues and users authorization changes in real-time from any access point.

Update and modify user access rights from any defined access point. Eliminates the need for users to go to specific doors to update / revalidate their expired key or change their access plan.

Control and manage all stand-alone access points remotely from one or more workstations.

Easy maintenance, battery low warning sent for maintenance.

More than 10 different opening modes to suit your needs.

SECURE

- In case of a power failure, the system keeps functioning because it's a stand-alone electronic locking system.
- Emergency openings can be performed through the PPD.
- Communication between the carrier, the physical network and the electronic door lock are encrypted and secured.

HOW IT WORKS

User key transmits to electronic lock / reader:

- Deleted cards list
- User access rights

Electronic lock / reader transmits to user key:

- Access event
- Battery status

User key transmits to the system via SVN:

- User access event
- Visited door battery status
- Deleted cards list
- User access rights

Electronic lock / reader transmits to card / user key:

- Deleted card list
- Updated user access rights
- Expiry date renovation

ProAccess SPACE functions:

- Add or delete users remotely
- User profiles updated easily
- Dynamic event audit trail
- Remote stand-alone device battery status report
- Expiry date renovation

SALTO BLUEnet WIRELESS REAL-TIME TECHNOLOGY

FLEXIBLE AND SECURE REAL-TIME MANAGEMENT

SALTO BLUEnet Wireless has been developed to meet the highest demands related to security and ease. This access control system is networked through Bluetooth RF and is especially designed for doors where real-time control is required.

A wireless access control solution based on the SALTO BLUEnet wireless communication permits electronic locks to update the user's keys and to provide real-time door monitoring. This enhances the performance and capabilities of the SALTO Virtual Network.

An access control technology that allows stand-alone SALTO BLUEnet wireless locks to update, store and send the latest access information from the user's smart keys throughout the building wirelessly and remotely.

SALTO BLUEnet can be installed as an independent system or can complement SALTO Virtual Network (SVN) in areas of a building where real-time control is required.

MAIN FEATURES AND BENEFITS

Wireless electronic locks provide better cost, convenience and aesthetics than a wired solution, achieving wired system benefits without the cost of hardwired systems.

If radio frequency is interrupted or breaks down, the access system will continue to work, as the virtual network of the battery-operated locks remains operational through SALTO SVN.

Wireless network communication architecture: One gateway can communicate with 7 nodes. Each node can operate up to 16 doors, with a maximum distance of 16m between the lock and the node. All by using one single IP address.

Designed for easy integration into existing access control systems, SALTO BLUEnet Gateways, Nodes and Repeaters connect to the system using Ethernet connectivity.

ADVANCED FEATURES AND FUNCTIONS

- Advanced security with standard encryption communications.
- Escutcheons and cylinders receive blacklist information and remove cancelled keys from the system in real-time.
- Receive audit trail information in real-time.
- Real-time door control: This includes door alarm, intrusion alarm, single lockdown and remote door opening.
- Real-time battery control enables maintenance to view escutcheon power status in real-time.

HOW IT WORKS

ProAccess SPACE functions:

- Access event
- Key cancellation
- Door monitoring
- Graphical mapping
- Battery status
- Remote emergency opening
- Lockdown in case of emergency situation
- Opening function mode

Gateway transmits to cylinder/escutcheon:

- Deleted card list
- Updates to the escutcheon or cylinder

Electronic lock / cylinder transmits to gateway:

- Access event
- Battery status
- Intrusions alarm

SALTO VIRTUAL NETWORK (SVN) ONLINE NETWORKED TECHNOLOGY

ONLINE NETWORKED LOCKING SYSTEM

The SALTO Virtual Network (SVN) online networked locking system is a state-of-the-art IP-based access control solution for applications requiring high levels of security.

The exchange of information via a user's contactless smart key and online access points is secured and encrypted. The online SVN is a data-on-card system based on a patented read/write technology. In SVN, all user-related access information is stored on ID credentials which act as carriers. The access rights are updated at hardwired online IP access points.

Advanced online features such as monitoring your building's graphical map, IP reader integration (long distance reader for vehicle access, fire alarm systems, biometric access control readers, etc.), trigger an alarm event engine module to further extend the advanced capabilities of the SALTO cutting-edge online access control system.

MAIN FEATURES AND BENEFITS

Reliable, high quality systems: Update straight away user's access permissions and access levels at the click of a button.

Architecture designed to adapt and grow with your needs: Control any type of building application, from just one door up to hundreds of doors, with thousands of users.

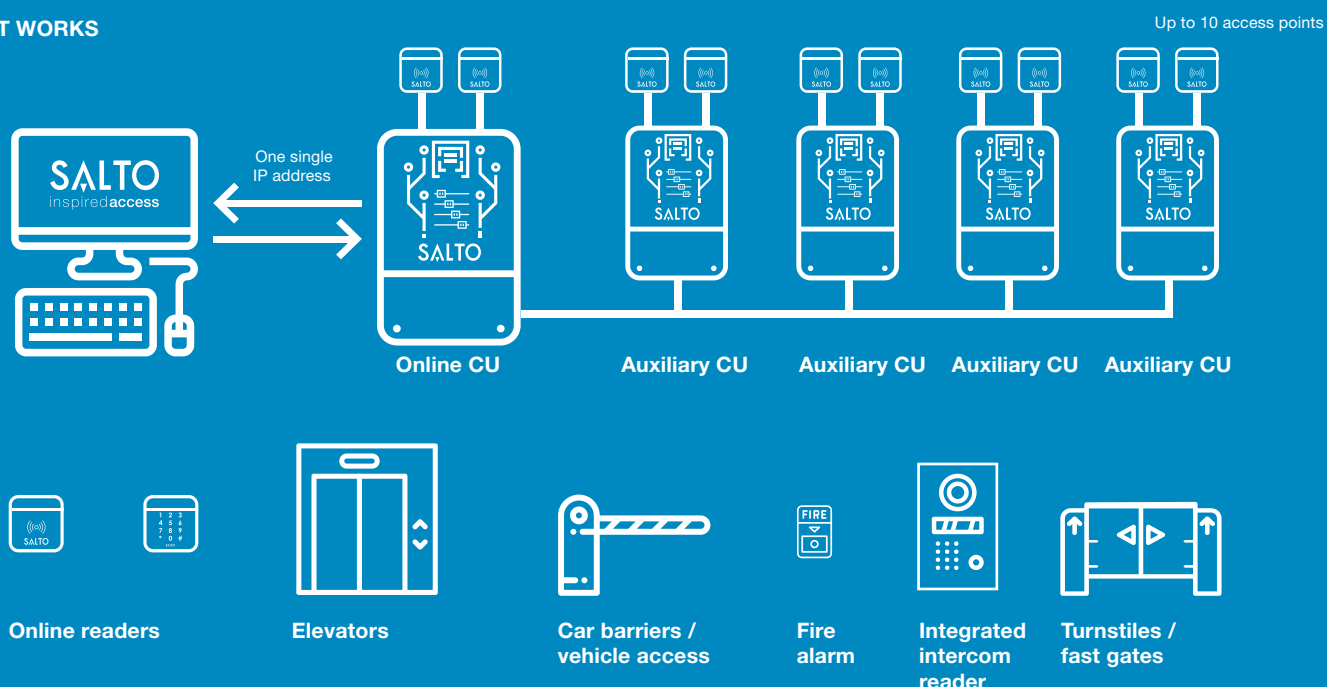

Control and manage multiple doors through one Ethernet connection, operate up to 4 auxiliary online controllers and up to 10 access points with a single IP address.

Event reporting: Online real-time audit trail showing who is where and when. Monitor all your users, staff and visitor movements on site, from your computer.

Link with your security systems: Easy-to-extend security beyond door control. You can integrate biometric or vehicle access readers, fire alarm systems or third-party security systems directly to your access control system.

Email and text alerts can be set up to alert you if a specific event has occurred.

HOW IT WORKS

JustIN
MOBILE

SALTO JustIN MOBILE MOBILE ACCESS TECHNOLOGY

MOBILE-BASED ACCESS CONTROL SOLUTION - BLE & NFC

SALTO's JustIN mobile technology makes it easy and secure to incorporate smartphones as a part of your access control solution. Using SALTO's JustIN technology, these solutions easily and flexibly bring better security and usability to both end users and system managers. End users gain convenience and productivity without sacrificing security, while facility managers distinguish their property with cost-effective solutions that clients truly value.

MAIN FEATURES AND BENEFITS

Use mobile phone as a door key. Access control systems compatible with NFC, BLE and RFID ID technologies.

USER FRIENDLY

- End user decides how to receive a key: as a JustIN Mobile or as a physical credential.
- Extend access or change access rights instantly and remotely.
- Works with a user's existing iOS or Android smartphone.
- JustIN Mobile app lets an end user receive their key online.

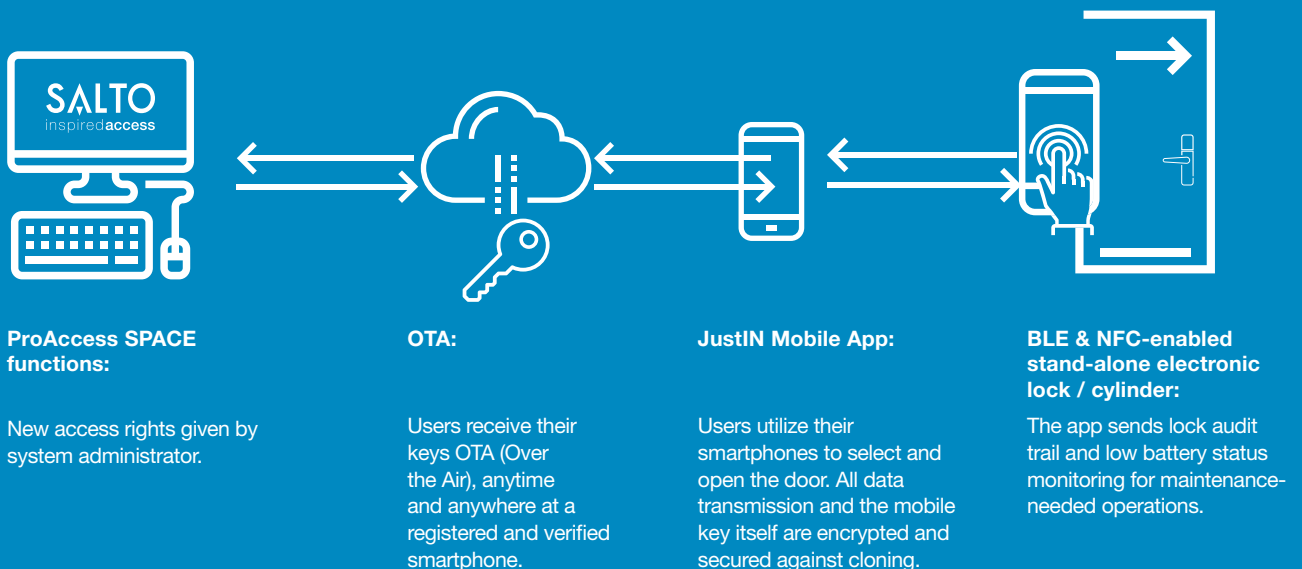

SECURE

- Smartphone authentication technology for verifying a mobile user's identity: PIN / Fingerprint.
- AES 128 bit encryption and secure opening procedure with key received securely encrypted using SSL.
- Instant key updates or key cancellations.
- Real-time access rights changes, audit trails, and blacklisting lost keys.
- For a higher security level, no information is stored in the SALTO JustIN cloud, used only as a temporary bridge.

SDK

iOS and Android software development kit (SDK) for the development of apps for JustIN Mobile access operating technology to make it easy and secure to incorporate smartphones as a part of your access control solution.

HOW IT WORKS

SALTO SALLIS

SEAMLESS COMBINATION OF DIFFERENT SECURITY SYSTEMS

In many security installations, there is a need for combining systems by different vendors. SALTO offers several ways to integrate with third-party products. This includes interfaces for connecting SALTO to third-party wired access control systems as well as integration with video surveillance, parking management, license/number plate recognition, biometrics, time & attendance, escape door control systems, Physical Security Information Management Systems (PSIMs), training systems for safety instructions and much more.

MAIN FEATURES AND BENEFITS

Completely compatible with the SALTO XS4 wireless escutcheon range.

Powerful diagnosis tool thanks to over 25 different event codes within the audit trail.

Based on audit trail: When lock is offline, lock will grant access to the user according to their last user event within the lock. For high transit doors.

Based on white list system: Up to 20 master keys subject to time zones can be stored in the lock memory. With proper set up, no door will be left without control. 600 audit trail events are stored on the lock, regardless of the state of the communication with the host.

ADDITIONAL FEATURES AND FUNCTIONS:

- Wireless communication AES 128 bit encryption.
- Wireless communication at 2.4ghz based on IEEE 802.15.4.
- Online audit trail and battery status control.
- Live door monitoring.
- 20 emergency codes subject to time zones.

HOW IT WORKS

HOST & database:

The HOST is the access control panel where the information related to access is hosted (users, time periods, calendars, etc.).

Router:

The SALLIS Routers and Nodes are the link between the host and the rest of the platform and enable communication with the wireless escutcheons and cylinders.

XS4 SALLIS electronic lock:

The wireless locking devices are the core of the locking system itself and enable control of doors without need for complex wiring installations.

SALTO KS KEYS AS A SERVICE

CLOUD-BASED ACCESS CONTROL, ON-THE-GO AND IN REAL TIME.

SALTO KS - Keys a a Service - makes access control a simple and secure solution for businesses to manage keys, users and doors across multiple locations.

No software installation, scaling on any device, secured login, intuitive design - anything you may expect from today's cloud is in the SALTO solution.

SALTO customers do not need to worry about any door running out of capacity, as SALTO KS is effectively infinite in size. The solution also incorporates state-of-the-art security measures in all components and, more importantly, to keep updating that permanently. Not always visible but always there. Manage locks, people, messages and important access rights with no hassle.

SALTO KEYS AS A SERVICE

The SALTO KS cloud-based access control platform allows you to control all of your locations and access needs from anywhere. Vastly better functionality and performance than a mechanical solution. Flexible, with no software installation required.

KSconnect

SALTO KS CONNECT

KS Connect allows SALTO KS customers to integrate with existing software applications which streamlines operations and maximizes technology. KS Connect enables third-party software and service providers to enrich offerings with smart-lock functionality.

EASY ACCESS CONTROL FOR YOUR BUSINESS

With SALTO KS there's no need to install a software or there's no need to replace a lock if keys are lost or stolen. Managing doors, keys and user access levels has never been easier and more secure; simply block a user key.

SALTO KS is an easy-to-use and simple-to-manage access control dashboard that supports your business needs for a modern physical access control solution that gets all doors online and unifies access with a single cloud solution.

MANAGE AND MONITOR PHYSICAL ACCESS IN THE CLOUD

SALTO KS allows you to individually define who can enter which doors during which time periods.

What no conventional key can do is change access rights on the fly. The SaltoKS.com website portal gives you the opportunity to quickly and easily determine who enters a property and when. If changes need to be made, then just log in, make the change, and it's done. No updating of the SALTO KS Tag or SALTO KS access point is necessary. Can you do this with your current lock?

SALTO KS

FROM WHEREVER YOU ARE. REGARDLESS OF WHERE YOUR BUSINESS IS.

SALTO KS has established proven reliability and its recognised stability brings cloud access control to any business, providing vastly better functionality and performance than is possible in a traditional mechanical solution. A flexible management system that requires no software installation, nor the cost of a fully-wired electronic product; the only item you need to manage SALTO KS is an online device with an Internet connection.

MAIN FEATURES AND BENEFITS

Open doors remotely. With SALTO KS “Code,” SALTO KS’ one-time password technology, users can open doors remotely without a key. One of the cool but functional features of SALTO KS is the remote access.

Gain activity insights. Receive notifications regarding door and user activity. SaltoKS.com provides a message center that allows users to self-configure messages. For example, learn who entered at what time, or when a door is left open. Messages can be configured to be sent to a number of recipients and to three receiving device types: Email, SMS and App push notifications.

Multiplatform. Manage SALTO KS from any device – phone, tablet, PC – all you need is an online device with an Internet connection.

Security. With SALTO KS App “Code,” SALTO KS’ one-time password technology, the system makes sure users have proper rights to perform changes.

HOW IT WORKS

SaltoKS.com and Mobile App:

Your portal to your account, where you can create access groups, manage users and view entries to your properties from your computer or mobile devices.

IQ:

The IQ is the hub of the SALTO KS solution.

Finds the best connectivity to communicate with SALTO KS locks and SALTO KS apps.

Door Locks:

The SALTO KS escutcheons & cylinders are specially designed to fit different profile doors, even narrow profile framed doors, and can be applied on exterior doors as well. SALTO offers a wide range of finishes to choose from.

Tag:

An RFID tag that makes keys a thing of the past.

The tag triggers the lock to engage within seconds so visitors or employees can enter easily and according to access rights.

SALTO KScconnect

CLOUD CONNECTED SERVICE PLATFORM

SALTO KScconnect offers a platform where future partners can find integrated cloud-based software and services.

SALTO has developed an ecosystem of cloud applications where future partners and services can be integrated. The result is a world of possibilities for service and hardware integration.

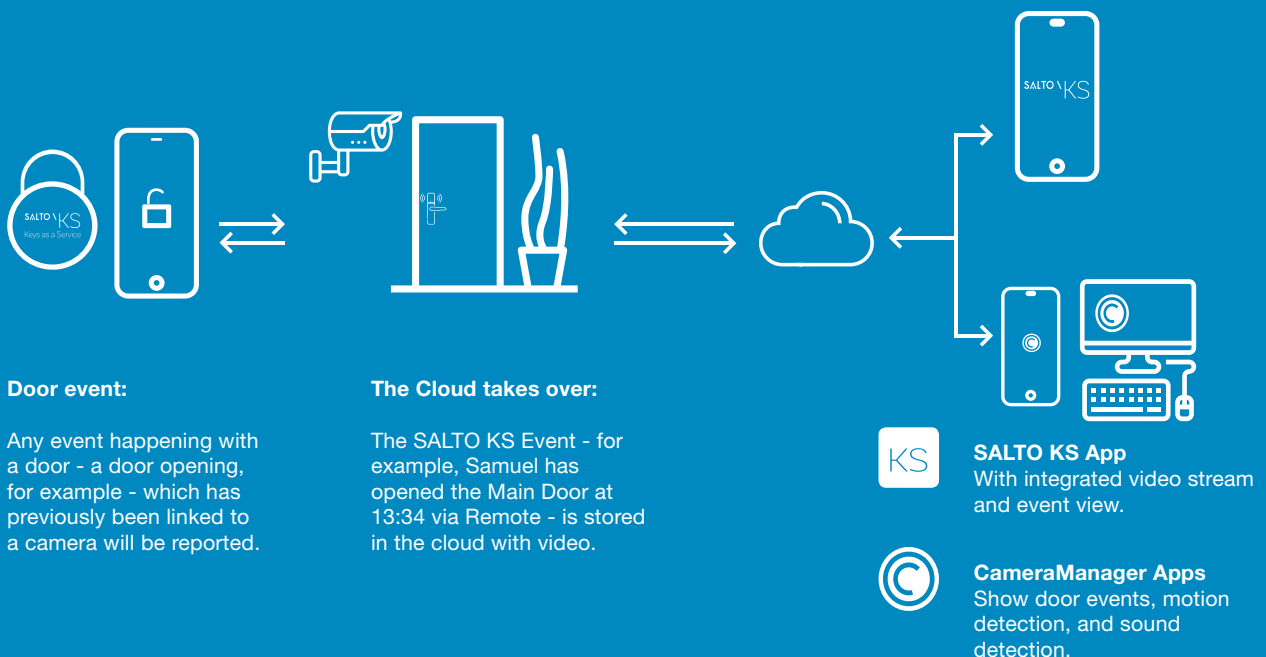

KScconnect allows SALTO KS customers to have integrations with existing software to run their business with ease. KS Connect enables third-party software and service providers to enrich offerings with smart lock functionality, as well as enhance the SALTO KS value proposition.

CAMERAMANAGER

Eagle Eye CameraManager is built for the cloud, providing reliability and redundancy. It's ideal for servicing multiple locations and provides access to live and recorded video, from one or more locations, with a single login. Eagle Eye CameraManager is also fully integrated into SALTO KS applications.

- **Easy set-up:** Add cameras in two steps.
- **Scheduling:** Record when needed.
- **Notifications:** Know what's up.
- **Live Streaming:** See who's in front of the door.
- **Event Recordings:** Look back in time.

XS4 BY SALTO | ELECTRONIC ESCUTCHEONS

Smart, secure, innovative and easy to install, the XS4 electronic escutcheon sets need no hard wiring and provide a totally wire-free networked electronic locking solution with a great range of features.

The XS4 escutcheon range is specially designed to fit on most standard doors, and work with the majority of Scandinavian, European and ANSI mortise locks and tubular latches.

TECHNICAL DATA

POWER SOURCE:

- XS4-40 narrow version: 3 alkaline batteries (LR03 - AAA 1,5V).⁽¹⁾
Optional 3 Lithium batteries (FR03 - AAA 1,5V - see environmental conditions).⁽²⁾
- XS4-60 wide version: 3 alkaline LR6 AA 1,5V. batteries.⁽¹⁾
Optional FR6 - AA1,5V. Lithium batteries.⁽²⁾

NUMBER OF OPENINGS:

- i-Button version: up to 60,000 on 1 set of batteries.
- Contactless versions: Up to 40,000 depending on the RFID technology.
- Low battery power indication monitored through the SALTO Virtual Network (SVN).
- The last approx. 1,000 operations are signalled.

ENVIRONMENTAL CONDITIONS:

- External escutcheon: 0° / 60° ⁽¹⁾
- External escutcheon: -20° / 60° ⁽²⁾
- Internal escutcheon: -20° / 60° ⁽²⁾

MAIN FEATURES

- Simple installation by changing handle set, reliable and durable.
- SALTO SVN and SALTO Wireless network capable.
- Door status detector to monitor intrusions or door left open status (wireless escutcheons only).
- User on card audit trailing capability via the SALTO Virtual Network (SVN).
- Covering the mainstream RFID technologies.
- NFC compatible.
- All communication between the carrier and the electronic lock is encrypted and secured.
- Low battery status information is obtained from carriers.
- The lock can always be opened from the inside (single action panic feature works in conjunction with the relevant mortise lock).
- High security protection via high resistance, hardened anti-drill plates to protect wiring and reader area.
- Handle fixed by steady fix system (patented).
- Concealed fixing screws for greater security and improved aesthetics.
- Available with mechanical cylinder cut outs for key override or access lock outs.
- Wide range of finishes, handles and retrofit cover plates.
- Suitable for emergency exits.
- Firmware upgrade through PPD.
- Emergency opening via portable programming device (PPD).

ACCESS CONTROL FEATURES

USERS & DOORS:

- Maximum number of users per door: 4 million.
- Maximum number of doors per system: 65,000.
- Access levels: unlimited.

CALENDARS & TIME ZONES:

- Calendars in system: 256
- Timetables: 1024
- Time periods: 1024

EVENTS:

- Maximum events on lock audit: 2200⁽³⁾.
- Non volatile memory (memory is not deleted, even if power fails).

MANAGEMENT SOFTWARE:

- SALTO ProAccess SPACE.

ID TECHNOLOGIES:

- Covering the mainstream RFID technologies.
- Compatible with ISO 14443A, ISO 14443B and ISO 15693 (Vicinity).

LOCK MODES

STANDARD:

Locked at all times.

OFFICE MODE:

Free passage.

TIMED OFFICE:

Automatic locking at end time.

AUTOMATIC OPENING:

8 pairs of "hands free" timed lock and unlocks per day with holidays.

TOGGLE:

Present card to lock, present card to unlock.

TIMED TOGGLE:

Present card to lock, present card to unlock depending on schedules.

AMOK MODE:

Local lockdown of the escutcheon for emergency situations (AMOK escutcheon models only).

EXIT LEAVES OPEN MODE:

The lock remains unlocked after the inside handle is used.

XS4 ORIGINAL - NORDIC

XS4 Sx40 | XS4 NORDIC ORIGINAL

The XS4 Original Nordic narrow body version is specially designed to fit most Scandinavian profile and narrow profile framed doors and to work with standard Scandinavian mortise locks and cylinders.

FEATURES:

- Simple installation is possible on any type of door, including those with narrow frames.
- Body and escutcheon made of steel.
- Available with mechanical cylinder cut outs for key override or access lock outs (override Scandinavian cylinder).
- Mechanical or electronic privacy option.
- AMOK option for offline lockdown.
- The lock can always be opened from the inside (single action panic feature works in conjunction with the SALTO LS5N15 series mortise lock).
- Complementary escutcheons without reader available to maintain the aesthetics of doors that do not need to be controlled.

READER COLOUR:

FINISHES:

IM IP IA PM PP NE BC

TECHNICAL CHARACTERISTICS:

- Covers door thicknesses: From 32mm up to 120mm.
- Dimensions: 282mm x 40mm x 20mm.
- Clutch mechanism escutcheon; when unlocked handle moves freely.
- Reversible handle left or right escutcheon.
- Handle rotation: 33°.
- Distance from the handle to the cylinder: 105mm.
- Compatible with Scandinavian standard mortise locks.
- Initial max. 4° pre-turn. SALTO recommends the use of a mortise lock with a maximum 4° pre-turn.
- Compatible with Scandinavian oval profile cylinders.
- Square spindles available: 8mm and 8mm split.

TECHNOLOGY PLATFORMS:

ID TECHNOLOGIES:

- MIFARE® (DESFire EV1, Plus, Ultralight C, Classic - ISO/IEC 14443).
- Bluetooth SMART (BLE).
- NFC.
- Inside Picopass.
- LEGIC Prime and LEGIC Advant.
- HID iCLASS® Seos™
- i-Button.

TECHNICAL DRAWING:

CERTIFICATIONS:

(*) External escutcheon.

XS4 ORIGINAL WIDE - NORDIC

XS4 Sx60 | XS4 NORDIC ORIGINAL WIDE BODY VERSION

The XS4 Original Nordic wide body version is specially designed for use on busy, high traffic doors that need additional strength or to cover old hardware holes and to work with standard Scandinavian mortise locks and cylinders.

FEATURES:

- Simple installation is possible on any type of door.
- Body and escutcheon made of steel.
- Available with mechanical cylinder cut outs for key override or access lock outs (override Scandinavian oval cylinders).
- Mechanical or electronic privacy option.
- AMOK option for offline lockdown.
- The lock can always be opened from the inside (single action panic feature works in conjunction with the SALTO LS5N15 series mortise lock).
- Complementary escutcheons without reader available to maintain the aesthetics of doors that do not need to be controlled.

XS4 ORIGINAL KEYPAD - NORDIC

XS4 Sx60K | XS4 NORDIC ORIGINAL WITH KEY PAD

The SALTO XS4 Original Nordic electronic lock with keypad increases security and control, as it offers the choice of three forms of authentication to grant access.

FEATURES:

- Simple installation is possible on any type of door, including those with narrow frames.
- Body and escutcheon made of steel.
- Three forms of authentication configurations available to grant access:
 - Credential only.
 - Credential plus PIN.
 - Door code.
- Available with mechanical cylinder cut outs for key override or access lock outs (override Scandinavian oval cylinders).
- Mechanical or electronic privacy option.
- The lock can always be opened from the inside (single action panic feature works in conjunction with the SALTO LS5N15 series mortise lock).

XS4 ORIGINAL SECURITY - NORDIC

XS4 Sx20 | XS4 NORDIC ORIGINAL SECURITY MODEL

The SALTO XS4 Original Nordic security model is an ideal choice for use on doors where a higher level of security protection is required, such as exterior doors, main entrances and high security openings. The tough, vandal-resistant construction protects this range against attack and unauthorised entry without losing flexibility or control.

FEATURES:

- Simple installation is possible on any type of door, including those with narrow frames.
- Body and escutcheon made of steel.
- Electronic privacy option.
- The lock can always be opened from the inside (single action panic feature works in conjunction with the SALTO LS5N15 series mortise lock).
- Complementary escutcheons without reader available to maintain the aesthetics of doors that do not need to be controlled.

XS4 MINI BY SALTO | ELECTRONIC DOOR LOCKS

Stylish design is a SALTO trademark and with the XS4 Mini, we raise the bar on this already high standard thanks to its small, discreet size combined with a modern, clean LED aesthetic.

The Mini's smart compactness simplifies installation. The XS4 Mini maintains the fire rating of the door as no additional drilling of the door is required.

TECHNICAL DATA

POWER SOURCE:

- XS4 Mini: 3 alkaline batteries - LR03 - AAA 1,5V

NUMBER OF OPENINGS:

- Contactless versions: Up to 40,000 openings.
- Low battery power indication monitored through the SALTO Virtual Network (SVN).
- The last approx. 1,000 operations are signalled.

ENVIRONMENTAL CONDITIONS:

- Not suitable for outdoor use.

MAIN FEATURES

- Fully integrated with the SALTO XS4 platform.
- Simple installation by changing handle set, using just two screws, whether installing on new or existing door standards.
- Easy to maintain: Battery change is all that's needed.
- For inside use: Attractive design is ideal for indoor use and easy to retrofit existing doors.
- User on card audit trailing capability via the SALTO Virtual Network (SVN).
- All communication between the carrier and the electronic lock is encrypted and secured.
- Low battery status information is obtained from carriers.
- Optical signalling through light ring. Dual colour green/red to indicate access authorisation.
- The lock can always be opened from the inside (single action panic feature works in conjunction with the relevant mortise lock).
- Concealed fixing screws for greater security and improved aesthetics.
- Available in 2 different reader finishes: White and Black.
- Wide range of finishes, retrofits, handles and retrofit cover plates.
- Firmware upgrade through contactless PPD.
- Emergency opening via contactless portable programming device (PPD).

ACCESS CONTROL FEATURES

USERS & DOORS:

- Maximum number of users per door: 4 million.
- Maximum number of doors per system: 65,000.
- Access levels: unlimited.

- Compatible with ISO 14443A, ISO 14443B and ISO 15693 (Vicinity).

LOCK MODES

STANDARD:

Locked at all times.

AUTOMATIC OPENING:

8 pairs of "hands free" timed lock and unlocks per day with holidays.

TOGGLE:

Present card to lock, present card to unlock.

TIMED TOGGLE:

Present card to lock, present card to unlock depending on schedules

OFFICE MODE:

Free passage mode (just on the ANSI version).

EXIT LEAVES OPEN MODE:

The lock remains unlocked after the inside handle is used.

ÆLEMENT - EU

AE91 | ÆLEMENT

The Ælement EURO version is specially designed to fit on most Euro DIN 18250 profile doors. The minimalistic design of the RFID reader looks stylish and discreet on any door. It also offers the choice of a wide range of designer lever handles and finishes.

ELECTRONICS FEATURES:

- Reader body made using double layered injection construction.
- Clear dual colour LED light (green/red) to indicate lock authorisation.
- Electronic privacy function option through button on the inside (for hotel industry). The user can activate the “do not disturb” function.
- Special blink and beep indication when lock is in privacy mode.
- Ability to enable/disable the acoustic signal.
- Compatible with European DIN 18250 mortise lock retrofit.
- EN1364-1 EI 60.
- Declaration of conformity CE.
- FCC/IC conformity.

READER COLOUR:

BASE FRAME FINISHES:

IM IP IA PM PP NE

TECHNICAL CHARACTERISTICS:

- Covers door thicknesses: From 35mm - 45mm up to 115mm - 125mm.
- Reader dimensions: 67mm x 45mm x 17mm.
- Battery pack dimensions (inside): 116mm x 65mm x 25.5mm.
- Handle block mechanism lock.
- Handle rotation: 33°.
- To be used in combination with SALTO LE7E37 mortise lock.
- Square spindles available: 8mm split and 9mm split (SALTO spindles required).

TECHNOLOGY PLATFORMS:

ID TECHNOLOGIES:

- MIFARE® (DESFire EV1, Plus, Ultralight C, Classic - ISO/IEC 14443).
- Bluetooth SMART (BLE).
- NFC.

TECHNICAL DRAWING:

DIN18250 ÆLEMENT MORTISE LOCK:

MORTISE LOCKS FEATURES:

- Axe distance 72mm.
- Lock latched deadbolt made of steel.
- Automatic deadbolt projection lock.
- Choice of finishes: satin stainless steel or gold enamelled.
- Front plate shape: square or round.
- Different backsets available: 55mm - 65mm.
- Handed lock - L/R - not reversible.
- Inside always allows free egress (Anti-panic in combination with lock).
- EN 12209 compliant.

ÆLEMENT - ANSI

AE90 | ÆLEMENT

The Ælement ANSI version is specially designed to fit on most ANSI A 156.13 doors. The minimalistic design of the RFID reader looks stylish and discreet on any door. It also offers the choice of a wide range of designer lever handles and finishes.

ELECTRONICS FEATURES:

- Reader body made using double layered injection construction.
- Clear dual colour LED light (green/red) to indicate lock authorisation.
- Mechanical privacy option by a mechanical thumbturn. The user can activate the "do not disturb" function just by operating this thumbturn.
- Special blink and beep indication when lock is in privacy mode.
- Ability to enable/disable the acoustic signal.
- Available with mechanical cylinder key override or access lock outs (override mortise cylinders).
- Compatible with ANSI A 125.13. mortise lock retrofit.
- UL10C compliant.
- Declaration of conformity CE.
- FCC/IC conformity.

ÆLEMENT FUSION BY SALTO | STYLISH LOCKS

Ælement Fusion is an electronic lock with a sleek reader accentuated by an interactive light ring that illuminates when access credentials are presented, providing a minimalistic design that blends with any hotel décor.

TECHNICAL DATA

POWER SOURCE:

- Ælement Fusion: 3 alkaline batteries - LR06 - AAA 1,5V.

NUMBER OF OPENINGS:

- Up to 50,000 openings.
- Low battery power indication monitored through the SALTO Virtual Network (SVN).
- The last 1,000 operations are signalled.

ENVIRONMENTAL CONDITIONS:

- Electronics: 0° / 60°.
- Not suitable for outdoor use.

MAIN FEATURES

- Easy to maintain: Battery change is all that's needed.
- Wire-free stand-alone networked system through SVN technology.
- SALTO SVN and SALTO BLUEnet network capable.
- Wireless ready lock that can be upgraded to BLUEnet online.
- Handle block mechanism lock.
- To be used only with SALTO ANSI Ælement mortise lock series.
- Clean, minimalistic round light ring design reader.
- Clear dual colour LED light (green/red) to indicate lock authorisation.
- Eliminates lock hardware on the door by encasing all electronic components inside the door itself.
- The lock can always be opened from the inside (single action panic feature works in conjunction with the SALTO mortise lock).
- Concealed fixing screws and electronic lock components within the door for greater security and improved aesthetics.
- Attractive range of standard handle designs and finishes, designer lever handles from well-known brands approved.
- DDA (Disability Discrimination Act) compliant (depending on handle type).
- Emergency opening via contactless Portable Programming Device (PPD).

ACCESS CONTROL FEATURES

USERS & DOORS:

- Maximum number of users per door: 4 million.
- Maximum number of doors per system: 65,000.
- Access levels: unlimited.

CALENDARS & TIME ZONES:

- Calendars in system: 256
- Timetables: 1024
- Time periods: 1024

EVENTS:

- Maximum events on lock audit: 2200.
- Non volatile memory (memory is not deleted, even if power fails).

MANAGEMENT SOFTWARE:

- SALTO ProAccess SPACE.

ID TECHNOLOGIES:

- Covering the mainstream RFID technologies.
- Compatible with ISO 14443A and ISO 15693 (Vicinity).

SALTO GEO BY SALTO | ELECTRONIC CYLINDERS

Extensive range of wire-free, stand-alone electronic cylinders designed for doors where fitting an electronic escutcheon is not possible or required (e.g. antique doors).

TECHNICAL DATA

POWER SOURCE:

- 1 Lithium standard battery CR2.

NUMBER OF OPENINGS:

- i-Button version: up to 60,000 on 1 battery.
- Contactless versions: > 200.000 cycles (EN 15684 class 6).
- Low battery power indication monitored through the SALTO Virtual Network (SVN).

ENVIRONMENTAL CONDITIONS:

- XS4 GEO Electronic cylinders: -20° / 60°.

IP CERTIFICATIONS:

- Outdoor Protection Standard
- IP55* MODEL (SALTO GEO standard model).
- IP66* MODEL (SALTO GEO water resistant model [GxxxxR]).

MAIN FEATURES

- Simple installation by changing the cylinder. No wiring or drilling work required.
- Wide range of models and options.
- SALTO SVN and SALTO Wireless network capable.
- User on card audit trailing capability via the SALTO Virtual Network (SVN).
- Covering the mainstream RFID technologies.
- NFC compatible.
- All communication between the carrier and the electronic cylinder is encrypted and secured.
- Low battery status information is obtained from carriers.
- Battery replacement without cylinder removal.
- Optical signalling through light ring. Dual colour green/red to indicate access authorisation. Acoustic signal optional.
- Equipped with anti-drilling protection.
- Optional torx screw to tighten the knob and convert the cylinder on a fixed knob cylinder.
- White and black reader finishes available.
- Wide range of finishes: satin chrome, polished chrome, polished bright brass type (PVD), satin brass type (PVD), black satin.
- Available with antimicrobial BioCote® coating.
- Suitable for emergency exits.
- Firmware upgrade through PPD.
- Emergency opening via portable programming device (PPD).

In addition to use on doors, other applications including post boxes, server racks, cupboards or boxes can be controlled protected by SALTO GEO electronic camlocks and padlocks against theft or unauthorized use.

ACCESS CONTROL FEATURES

USERS & DOORS:

- Maximum number of users per door: 4 million.
- Maximum number of doors per system: 65,000.
- Access levels: unlimited.

TECHNICAL CHARACTERISTICS:

- Thickness available from 40mm up to 370mm (special body length available for glass doors).
- Plus plug options (+5mm / +10mm) for doors where cylinders need additional length between the knob and the body.
- Different cam options:
 - European profiles DIN 15mm.
 - Cog wheel: 10 tooth cam and 13 tooth cam.
 - Spain: 13,2mm for metal doors.
- Versions for glass doors available.
- Modular cylinder body assembly on standard configuration option available.
- Available with 2 different locking thumbturns on the inside to operate the cam.
- Anti-panic function available.
- AMOK function available for cylinders with thumbturn.

SALTO GEO - CAM LOCK

SALTO GxCL | CAM LOCK CYLINDER

The SALTO GEO Cam Lock electronic cylinder is specially designed to fit most cabinets equipped with a cam locking mechanism. The cam itself acts as a locking bolt and is directly operated when the card is presented by the user and turns the plug. The cam rotates between 180 and 90 degrees, securing the lock. This patented system provides an extra level of protection from intrusions with a high security blocking mechanism that is exclusive to SALTO.

FEATURES:

- SALTO SVN and SALTO Wireless network capable.
- All communication between the carrier and the electronic cylinder is encrypted and secured.
- The batteries can be replaced without cylinder removal.
- Optical signalling through light ring. Dual colour green/red to indicate access authorisation. Acoustic signal optional.
- Equipped with anti-drilling protection.
- Optional torx screw to tighten the knob and convert the cylinder on a fixed knob cylinder.
- Emergency opening via portable programming device (PPD).

READER COLOUR:

FINISHES:

SALTO GEO - SWING HANDLE

SALTO GxE | SWING HANDLE

The SALTO GEO half cylinder is specially designed to fit most swing handle* rack servers. Ideal for use on applications where control of the operation of the rack is needed, enhancing the control and security of access to the server racks.

FEATURES:

- SALTO SVN and SALTO Wireless network capable.
- All communication between the carrier and the electronic cylinder is encrypted and secured.
- The batteries can be replaced without cylinder removal.
- Optical signalling through light ring. Dual colour green/red to indicate access authorisation. Acoustic signal optional.
- Equipped with anti-drilling protection.
- Optional torx screw to tighten the knob and convert the cylinder on a fixed knob cylinder.
- Emergency opening via portable programming device (PPD).

SALTO GEO - PADLOCKS

SALTO GxP | PADLOCKS

The SALTO GEO Electronic Padlock is a versatile locking solution that enables users to benefit from the advantages of electronic access control where previously it was only possible to use a mechanical locking solution (i.e., perimeter or fire access gates, industrial equipment yards and residential storage areas).

FEATURES:

- SALTO SVN and SALTO Wireless network capable.
- All communication between the carrier and the electronic cylinder is encrypted and secured.
- The batteries can be replaced without cylinder removal.
- Optical signalling through light ring. Dual colour green/red to indicate access authorisation. Acoustic signal optional.
- Equipped with anti-drilling protection.
- Optional torx screw to tighten the knob and convert the cylinder on a fixed knob cylinder.
- Suitable for medium to high security applications.
- Emergency opening via portable programming device (PPD).

WALL READERS | PERIPHERALS

SALTO offers a wide range of wall readers that, in combination with SALTO Door Controllers enable the expansion of SALTO access control benefits to all those doors where a stand-alone electronic lock cannot be fitted, i.e. barriers, lifts, sliding doors or electronic gates, where control must be boosted by online real-time access control.

TECHNICAL DATA

- Modern aesthetic design with clear LED signaling.
- Fully integrated with the SALTO XS4 platform.
- Virtual network capable through SALTO Virtual Network dat-on-card technology.
- Covering the mainstream RFID technologies.
- NFC compatible.
- All communications between the carrier and the wall reader are encrypted and secure.²
- Acoustic and optical signalling, dual colour green/red to indicate access authorisation.
- Blue coloured LED to indicate carrier updating.
- Available in different finishes.
- Concealed fixing screw for greater security and improved aesthetics.
- For external use and protection against vandalism; can be used with the WRMFWAV frame and flush mounting base.³
- Connection to the door controller using AWG24 twisted pair or AWG18 cable connection.
- Compatible with standard electrical back boxes for easy fitting.*
- Can be used for integration with other systems through the addition of the Wall Reader Adaptor or Control Unit Adaptor.
- Emergency opening by means of contactless portable programming device (PPD).

MAIN FEATURES

CURRENT REQUIRED:

- 5V supplied by the door controller.

CONNECTION WITH THE DOOR CONTROLLER:

- Using AWG24 twisted pair or AWG18 cable connection.

MAXIMUM DISTANCE BETWEEN THE DOOR CONTROLLER AND THE WALL READER:

- 400 meters⁴ using a twisted pair cable.

ENVIRONMENTAL CONDITIONS:

- External lock: -20° / 60°.

The wall readers read encrypted data contained on the carrier and communicate it to the door controller. They also allow for updating of the carrier via SALTO Virtual Network (SVN) technology, making it possible to cancel lost or stolen cards remotely.

ACCESS CONTROL FEATURES

USERS & DOORS:

- Maximum number of users per door: 4 million.
- Maximum number of doors per system: 65,000.
- Access levels: unlimited.

CALENDARS & TIME ZONES:

- Calendars in system: 256
- Timetables: 1024
- Time periods: 1024

EVENTS:

- Maximum events on controller: 5,000.
- Non volatile memory (memory is not deleted, even if power fails).

MANAGEMENT SOFTWARE:

- SALTO ProAccess SPACE.

ID TECHNOLOGIES:

- Covering the mainstream RFID contactless technologies.
- Compatible with ISO 14443A, ISO 14443B and ISO 15693 (Vicinity).

WALL READER - ORIGINAL

WRXXFS | [ORIGINAL WALL READER NARROW](#)

The SALTO Original slim wall reader for flush mounting has been specially designed to fit lifts, sliding doors or electronic gate doors that have a narrow profile frame, and where there is insufficient space to install a standard wall reader.

It offers a broad range of 13,56Mhz RFID contactless smart cards for mainstream RFID technologies. All communication between the carrier and the wall reader is encrypted and secured to communicate to the CU5000 door controllers range. They also allow for updating of the carriers via SALTO Virtual Network data-on-card technology.

FEATURES:

- Compact slim reader module design reader with green/red LED signal.
- Easy to install, designed for surface mounting in both indoor and outdoor non-protected environment use.
- Fully integrated with the SALTO XS4 platform.
- Virtual network capable through SALTO Virtual Network technology.
- Acoustic and optical signalling, dual colour green/red to indicate access authorisation.

WALL READER - PEDESTAL

WRMPX | WALL READER PEDESTAL

A parking or gate pedestal designed for the SALTO Modular Wall Reader range is a product developed to allow for the installation of readers and controllers in places where they cannot normally be fitted, such as on door frames, automatic barriers or electrical gates. Suitable for indoor and outdoor use; it can be combined with any model of XS4 Original wall reader and 5000 door controller series.

Made of AISI316L bright polished stainless steel and DDA compliant, the Modular Wall Reader Pedestal is suitable for use in a wide range of environments including hospitals, airports, universities, schools, etc.

FEATURES:

- Aesthetically pleasing, architecturally designed, functional, high quality, strong and durable.
- DDA compliance optional.
- Fully integrated with the SALTO XS4 platform and SALTO Virtual Network capable in combination with XS4 door controller.
- Acoustic and optical signalling, dual colour green/red to indicate access authorisation.
- Optional with keypad features in combination with WRMPK.
- Can be combined with the antivandalic frame WRMFVAV for enhanced robustness.
- Special base cut out for easier installation and pedestal door panel for easy maintenance (base plate, side walls, reader panel).
- Single height reader pedestal suits general access control requirements and is suitable for many different applications.
- Concealed fixing screw for greater security and improved aesthetics.

PEDESTAL FINISH:

TECHNICAL CHARACTERISTICS:

- Made of AISI 316L bright polished stainless steel.
- To be used in combination with SALTO controllers (CU50xx).
- Connection to the door controller: 5 wires.
- Designed to work with an online SVN access control platform, or with a stand-alone system.
- Maximum distance between the door controller and the wall reader 100m¹ using a twisted pair cable.
- Reading distance from 35 to 50mm depending on the RFID technology.

WALL READER - ACCESSORIES

WRMFH | ANTIVANDALIC FRAME

This accessory has been designed to protect the WRM wall reader from adverse and harsh environments.

FEATURES:

- Robust, aesthetic design.
- Fastened with torx 10 anti tamper screws.
- Includes a special mounting base with a rubber gasket for outdoor use.
- Available in satin chrome finish.
- For surface mounting WRMFHAV.
- For flush mounting WRMFVAV.

TECHNICAL CHARACTERISTICS:

- Made of die cast zinc alloy with satin chrome finishing.
- To be used in combination with XS4 Original Modular wall reader (WRMxxx) and Modular wall reader XS4 2.0 (WRMBxxx).

TECHNICAL DRAWING:

WRMKP | KEYPAD MODULAR WALL READER

Compatible with SALTO modular wall readers, the WRMKP keypad allows for the additional use of a Personal Identification Number (PIN) key pad option. It should be mounted on one of the SALTO WRM double mount bases.

FEATURES:

- PIN code authentication needed with ID carrier to gain access and obtain card update.
- Door code only option for non-key holders.
- PIN needed for SVN key update.
- Timed PIN option for ID carriers only operation and ID carrier plus PIN use.

TECHNICAL CHARACTERISTICS:

- To be used in combination with XS4 Original Modular wall readers (WRMxxx).
- Body made of die cast zinc alloy with satin chrome finish.
- Keys made of AISI 316L stainless steel.
- Connection to the wall reader with a built in cable.
- Current required 5V supplied by the Modular Wall Reader.

TECHNICAL DRAWING:

WALL READER - ACCESSORIES

WRMB | MODULAR WALL READER BASES

SALTO offers several base options to fit modular wall readers. Depending on your needs, you can choose a single or double base to fit a wall reader and a keypad.

Both bases include an internal gasket to prevent water ingress and have several fixing points to allow for adjustment during installation.

FEATURES:

- Compatible with standard European electric boxes using the standard bases.
- Available in different finishes depending on the WRM.
- For surface mounting WRMFHAV.
- For flush mounting WRMFWAV.

MAIN FEATURES

- 2 readers models:
 - Reading distance up to 7m.
 - Reading distance up to 3m.
- UHF passive technology.
- Dual cards available:
 - UHF+DESFire 8k
 - UHF+Mifare 4k
- 8 bytes printed code.
- UHF Windshield stickers.
- UHF On metal stickers.
- Wiegand connection to the CU42E0 (online version only).
- Unique user is managed in ProAccess SPACE (RFID/UHF)
- Suitable for vehicles access.
- Suitable for outdoor use (IP65).
- 12VDC-24VDC (power supply not included).

LONG-DISTANCE READER

WRLUD24BXX - WRLUD14BXX | [VEHICLE ACCESS](#)

Extremely robust die-cast aluminium housing and compact design with integrated antenna. The WRLUD24Bxx boasts a range of 7m and the WRLUD14Bxx covers 3m. It is a complementary product to the SALTO XS4 online Controller for a real time identification on the go.

FEATURES:

- Modern aesthetic and robust design with 3 LEDs green/red and blue.
- Can be mounted on pipes or surface mounting.
- Compatible with SALTO XS4 Controller online version (CU42E0 only).
- Reading distance between 1 and 7 meters depending on the model.

MODELS:

TECHNICAL CHARACTERISTICS:

- Dimensions: 200mm x 175mm x 60mm (W x H x D)

CONTROL UNITS | CONTROLLERS

SALTO offers a wide range of door controllers that enable the expansion of SALTO access control benefits to all those doors where a stand-alone electronic escutcheon cannot be fitted.

The door controllers read encrypted data contained on the carrier and allow for updating of the carrier via SALTO Virtual Network technology, making it possible to cancel lost or stolen cards remotely.

TECHNICAL DATA

CURRENT REQUIRED:

- 12V / 500mA adaptor included.

NETWORK CONNECTION

- IP door controller Ethernet.

ENVIRONMENTAL CONDITIONS:

- -20°C to 80°C.¹

RELAY OUTPUT:

- Maximum current of the contact to relay 16A at 250VAC with resistive loads and 8A at 250VAC with inductive loads.¹

ACCESS CONTROL FEATURES

USERS & DOORS:

- Maximum number of users per door: 4 million.
- Maximum number of doors per system: 65,000.
- Access levels: unlimited.

CALENDARS & TIME ZONES:

- Calendars in system: 256
- Timetables: 1024
- Time periods: 1024

EVENTS:

- Maximum events on lock audit: 5,000.
- Non volatile memory (memory is not deleted, even if power fails).

MANAGEMENT SOFTWARE:

- SALTO ProAccess SPACE.

MAIN FEATURES

- Offline or online door controllers depending on the model.
- Virtual Network capable through SALTO Virtual Network technology.
- User on card audit trailing capability via the SALTO Virtual Network (SVN).
- All communications between the wall reader and the door controller and between the door controller and the PC are secured and encrypted for a higher security level.
- No additional control panels are required.
- Alarm input.¹
- Compatible with SALTO relay extension board, controlling up to 128 relay outputs suitable for elevators, etc.
- Possible to connect 3rd party readers to SALTO access control platform by wiegand interface.
- Set up done with Portable Programming Device (PPD) or directly from the PC.*
- Update made with Portable Programming Device (PPD) or SVN.
- Antipassback mode available depending on the model.
- Firmware upgrade by means of PPD or directly from the PC on the online units.
- User on card audit trailing via SALTO Virtual Network in the case of offline units.

LOCK MODES

STANDARD:

Locked at all times.

OFFICE MODE:

Free passage.

TIMED OFFICE:

CU SVN ONLINE - CONTROLLER

CU42E0 | ETHERNET CONNECTED CU

SALTO's control unit makes it even easier to bring superior access control to your facility, thanks to the ability to control and manage multiple doors through one Ethernet connection and one IP address.

This means that extending SALTO access control benefits to all those doors where a stand-alone electronic escutcheon cannot be fitted (electric strikes, magnets, barriers, elevators, etc.) is even easier and more cost-effective.

FEATURES:

- Online TCP/IP networked based door control unit.
- Virtual network capable through SALTO Virtual Network data-on-card technology.
- Two wall reader connections that can be configured as 2 different doors or one door reader in and reader out locking.
- Can control up to 4 auxiliary XS4 controllers and manage up to 10 doors.
- Antipassback mode.
- Door monitoring and tamper monitoring via contacts input (intrusion alarm and door left opened alarm.)
- Compatible with SALTO relay expansion board, (CU4EB8) controlling up to 128 relay outputs.
- Compatible with the SALTO ProAccess SPACE alarm engine event module to manage trigger events through inputs or audit events.

FINISHES:

Translucent housing
CU42E0T

Grey housing
CU42E0G

TECHNICAL CHARACTERISTICS:

- Connection to the network through Ethernet connection 100BASET.
- 4 relay outputs.
- 6 inputs to connect to:
 - Door detector, request to exit switch (RTE), office switch, roller blind control, intrusion inhibition.
- 2 tamper inputs (input, switch).
- The maximum cable length between the door controller and the wall reader is up to 400 meters.¹
- Connection to the wall reader using 4 wire connection, twisted pair.
- Power consumption: 12V DC 400mA (without XS4 2.0 readers), supplied by an adaptor. POE version to be released.

TECHNOLOGY PLATFORMS:

SALTO SPACE

ID TECHNOLOGIES:

CU AUXILIARY - CONTROLLER

CU4200 | AUXILIARY CONTROL UNIT

SALTO's latest control unit makes it even easier to bring superior access control to your facility, thanks to the ability to control and manage multiple doors through one Ethernet connection and one IP address.

The new SALTO Controller CU4200 is an auxiliary controller that does not require an IP address and can be set up as an auxiliary controller connected to an XS4 online controller (CU42E0), or can work as an offline controller, reducing the costs of installation and keeping all the advantages of the SALTO Data-on-card technology.

FEATURES:

- Online controller if connected through BUS485 to CU42E0.
- Offline controller if not connected to the network.
- Two wall reader connections that can be configured as 2 different doors if it is connected to CU42E0, or one door reader in and reader out locking, if set up as offline and programmed via PPD.
- Antipassback mode available by connecting 2 wall readers and setting up as one door.
- Door monitoring and tamper monitoring via contacts input (intrusion alarm and door left opened alarm).
- Access plan update via SALTO Virtual Network capabilities. User access plan and blacklist (list of users card cancelled) is transmitted via the data-on-card technology.

FINISHES:

CU SVN ONLINE - CONTROLLER

CU50ENSVN | ONLINE SVN CONTROL UNIT

The SALTO CU50ENSVN is an online door controller that can have one or two wall readers connected, has two control relay outputs and has SALTO Virtual Network (SVN) capabilities. Cards are automatically updated with the latest changes in the access plan. It records the user audit into the PC and provides advanced information on battery status.

It also continually updates the cancelled ID carrier blacklist simply by using the cards on the network, distributing the latest access information throughout the building via the offline stand-alone locks. Access control changes can be carried out on the SALTO software and these are then actioned at the control units in real time. It provides full online features via the networked live link such as door monitoring status, remotely controlling door opening and Roll Call.

FEATURES:

- Online IP door controller 10BASET.
- Two wall reader connections, read in – read out locking.
- Antipassback function.
- Two relay output.
- Compatible with SALTO relay extension board (EB5008) controlling up to 128 relay outputs suitable for elevators, etc.
- Can be used with the SALTO WRMKP for dual identification (Carrier + PIN).
- Request to exit (RTE) switch input.
- Door monitoring and tamper monitoring via contacts input.
- Door state input.

SALTO VIRTUAL NETWORK CAPABILITIES:

- Add or delete access privileges to the ID carriers.
- Validation of key expiration dates on any SVN on-line wall reader (also when being temporary offline).
- Cards blacklisting from the system.
- On card audit-trailing to track staff or visitor movement.
- Lock specific battery power data is registered on any card using the lock – staff or visitor – and transferred back to the PC control software via any update reader just by using the system.

ONLINE FEATURES:

- Same online features as CU50EN.

TECHNICAL CHARACTERISTICS :

- 2 relay outputs.
- Door detector, request to exit switch (RTE), office switch.
- One tamper switch.
- The maximum cable length between the door controller and the wall reader is up to 100 meters.
- Connection to the wall reader using a 5 wire connection, twisted pair.
- Power consumption: 12V DC 400mA (without SALTO readers), supplied by an adaptor.

CU EXTENSION BOARD

EB5008 | RELAY EXTENSION BOARD

The EB5008 provides the option to manage multi-relay switchable output systems such as elevator floor level access, multi-shutter and barrier systems, machine switching and more.

FEATURES:

- Up to 16 EB5008's can be connected in series to 1 door controller, allowing management of up to 128 outputs.
- Each output has user access (triggering) rights controlled from the software.
- Compatible with CU5000, CU50EN or CU50ENSVN door controllers.

TECHNICAL CHARACTERISTICS:

- Connection to the controller through BUS485.
- Set up through dip switch.
- 8 relay outputs.
- Connection to the controller using a 2 wire connection, twisted pair.
- Current requires 12V/500mA. Power adaptor included.
- Number of relays each board: 8 (Max. of 16 EB5008 board in series, totalling 128 relay outputs).

XS4 LOCKER | FOR LOCKERS AND CABINETS

The XS4 Locker Lock provides high level security to a wide range of lockers, cupboards, cabinets, boxes, etc. by integrating it into the SALTO wire-free electronic access solution. It features an ergonomically designed twist operated locking

handle that makes for easy use, even with wet hands. The battery pack, electronic components and locking mechanism are all located on the inside of the door, safe from potential vandalism or sabotage.

TECHNICAL DATA

POWER SOURCE:

- 3 alkaline batteries (LR03 AAA 1,5V).
Optional 3 Lithium batteries (FR03 - AAA 1,5V - see environmental conditions).

NUMBER OF OPENINGS:

- Up to 40,000 openings, depending on the RFID technology.
- Low battery power indication monitored through the SALTO Virtual Network (SVN).
- The last approx. 1,000 operations are signalled.

ENVIRONMENTAL CONDITIONS:

- - 20°C to +70°C; without condensation (according to EN 60529).
- Inner temperature range: - 0°C to +50°C (-20° / 70° with Lithium batteries; without condensation).
- IP56 rated for protection against ingress of water and dust.

MAIN FEATURES

- Fully integrated with the SALTO Hospitality platform.
- Easy to maintain: Battery change is all that's needed.
- Simple offline installation is possible on many types of small and thin locker doors.
- Door thickness: adaptable on site.
- Outer thumbturn with red/green indicator for availability of the locker, electronically managed release.
- Comes with BioCote® antimicrobial technology.
- Lock with large security deadbolt is built into the locker.
- Ideal for retrofit applications as outside locker lock reader rotates for different door handing and styles.
- No handing.
- Battery pack, electronic components and locking mechanism are all located on the inside of the door, safe from potential vandalism or sabotage.
- All communication between the carrier and the electronic lock is encrypted and secured.
- Low battery status information is obtained from carriers.
- Full access control rights programmed via software.

ACCESS CONTROL FEATURES

USERS & LOCKERS:

- Maximum number of users per locker: 4 million.
- Maximum number of lockers per system: 65,000.
- Access levels: unlimited.

CALENDARS & TIME ZONES:

- Calendars in system: 256
- Timetables: 1024
- Time periods: 1024

EVENTS:

- Maximum events on locker audit: 1,000.
- Non volatile memory (memory is not deleted, even if power fails).

SALTO KPBs

XS4 PANIC BARS | EMERGENCY EXIT SOLUTIONS

SALTO Advanced panic bar solutions enable emergency exit doors equipped with panic bars to be controlled with an innovative stand-alone electronic locking system.

TECHNICAL DATA

POWER SOURCE:

- 3 alkaline batteries - LR03 - AAA 1,5V.

NUMBER OF OPENINGS:

- Contactless versions: Up to 40,000 openings.
- Low battery power indication monitored through the SALTO Virtual Network (SVN).
- The last approx. 1,000 operations are signalled.

ENVIRONMENTAL CONDITIONS:

- External lock: -20° / 60°.

MAIN FEATURES

- Fully integrated with the SALTO XS4 platform.
- Simple installation by changing handle set, using just two screws.
- System composed of a SALTO XS4 half escutcheon, a Kit Panic Bar (KPB) and the panic bar (can also be an existing one).
- Existing emergency exits can be retrofitted and upgraded into an electronic stand-alone access control system.
- Easy to maintain: Battery change is all that's needed
- Wireless capabilities possible to avoid wiring without sacrificing online real-time capabilities.
- User on card audit trailing capability via the SALTO Virtual Network (SVN).
- All communication between the carrier and the electronic lock is encrypted and secured.
- Low battery status information is obtained from carriers.
- Optical signalling through light LED signal. Dual colour green/red to indicate access authorisation.
- The lock can always be opened from the inside (single action panic feature works in conjunction with the panic bar device).
- Available in 2 different finishes: satin stainless steel and polished stainless steel.
- Firmware upgrade through PPD.

SALTO stand-alone electronic locks can be fitted, in combination with adaptor kits, to more than 40 leading panic bars from the most popular manufacturers, whether you have a mortise panic device or a RIM panic device.

ACCESS CONTROL FEATURES

USERS & DOORS:

- Maximum number of users per door: 4 million.
- Maximum number of doors per system: 65,000.
- User access levels: Unlimited.

CALENDARS & TIME ZONES:

- Calendars in system: 256
- Timetables: 1024
- Time periods: 1024

EVENTS:

- Maximum events on lock audit: 2200.
- Non volatile memory (memory is not deleted, even if power fails).

MANAGEMENT SOFTWARE:

- SALTO ProAccess SPACE.

ID TECHNOLOGIES:

- Covering the mainstream RFID technologies.
- Compatible with ISO 14443A, ISO 14443B and ISO 15693 (Vicinity).

XS4 PANIC BAR - EURO

XS4 PBE900 | XS4 PANIC BAR PBF900

The SALTO XS4 PBE900 combines the highest safety standards with ease of use. It is EN1125 compliant in combination with SALTO electronic escutcheons, LE7E31 or LE9E11 SALTO mortise locks, and SALTO KPB (Kit Panic Bars). Its modern, aesthetic design makes it the perfect choice to complement any architectural style.

FEATURES:

- SALTO SVN and SALTO Wireless network capable.
- All communication between the carrier and the electronic cylinder is encrypted and secured.
- The batteries can be replaced without cylinder removal.
- Equipped with anti-drilling protection.
- Suitable for medium to high security applications.
- Emergency opening via portable programming device (PPD).
- Available with mechanical cylinder cut outs for key override or access lock outs (override European profile cylinder).
- AMOK option for offline lockdown.

MECHANISM FINISH:

BAR FINISHES:

IM RE GR

TECHNICAL CHARACTERISTICS:

- Mortise panic device.
- Mechanisms made of galvanized steel.
- To be installed in combination with Ex450 or Ex650 SALTO half escutcheons depending on the KPB.
- KPB01 or KPB02 required depending on the combination of the half escutcheon and the mortise lock.
- To be used with SALTO LE7E31 or LE9E11 mortise lock ranges
- Handing DIN left /DIN right usable.
- Maximum wing width: 1300mm.
- Cover dimensions: 200mm x 35mm x 108.5mm
- Spindle angle turn: 30° or 45° depending on the model.
- Square spindle: 9mm.

XS4 PANIC BAR - EURO

XS4 PBA1200 | XS4 PANIC BAR PBA1200

The SALTO XS4 PBA120 is a new mortise lock panic bar for emergency exit doors. EN1125 tested and approved. Also available with a passive leaf panic bar for double emergency exit doors.

FEATURES:

- SALTO SVN and SALTO Wireless network capable.
- All communication between the carrier and the electronic cylinder is encrypted and secured.
- The batteries can be replaced without cylinder removal.
- Equipped with anti-drilling protection.
- Suitable for medium to high security applications.
- Emergency opening via portable programming device (PPD).
- Available with mechanical cylinder cut outs for key override or access lock outs (override European profile cylinder).
- AMOK option for offline lockdown.

MECHANISM FINISH:

XS4 PANIC BAR - PUSH BAR

XS4 PBF110 | XS4 PANIC BAR PBF110

The SALTO XS4 PBF110 device is the emergency exit door's highest standard for security, with enhanced safety performance features. It combines the highest safety along with ease of use and installation. SALTO XS4 PBF110 series exit devices are UL listed for Panic Hardware and Fire Exit Hardware, and are certified according to ANSI A156.3, 2001, Grade 1.

FEATURES:

- SALTO SVN and SALTO Wireless network capable.
- All communication between the carrier and the electronic cylinder is encrypted and secured.
- The batteries can be replaced without cylinder removal.
- Equipped with anti-drilling protection.
- Suitable for medium to high security applications.
- Emergency opening via portable programming device (PPD).
- Exit signal when bar depressed.
- AMOK option for offline lockdown.

MORTISE LOCKS | RELIABLE LOCKING

Access control requires a good, reliable door smart locking system. SALTO offers a wide range of mortise locks in order to ensure that the door is correctly locked. Whether you need ANSI mortise locks, Euro DIN locks for wooden doors or narrow profiles, Scandinavian locks, cylindrical

cartridge latches or automatic locks with privacy and panic functions, SALTO has the locking system you need. Our complete range of mortise locks enable you to install SALTO electronic escutcheons and cylinders without compromising security.

MAIN FEATURES

- Lock case, latch and deadbolt made of steel.
- ANSI, Euro locks, DIN locks (distances 72mm, 85mm and 92mm), SIS Scandinavian standard and cylindrical latch models.
- Wide range of backsets and front plate configurations to fit most doors.
- Optional panic function for greater security of users or guests.
- Equipped with auxiliary latch (anti card system) to prevent unwanted intrusions.
- Highest certifications compliant.*
- With automatic deadbolt or latch through-in option.
- Optional with door detector to monitor the status of the door without any additional hardware.*
- Optional with deadbolt detector for electronic privacy function.
- Optional key override function for greater security of users or guests.

* Depending on the mortise lock model, the certifications can vary.

NORDIC MORTISE LOCK

LS5N | SCANDINAVIAN MORTISE LOCK

Wide range of specially designed Scandinavian standard mortise locks that ensure the door is locked correctly and securely. Developed to increase both the security and safety of the entire door, especially when used with access control and building key management systems. Suitable for use with Scandinavian XS4 Nordic escutcheons, XS4 Nordic Mini electronic locks and XS4 Nordic GEO cylinder models on both interior and exterior doors.

FEATURES:

- Scandinavian standard mortise lock.
- Suitable for XS4 Nordic standard escutcheons and electronic cylinders.
- High security lock for exterior and interior Scandinavian standard doors.
- Scandinavian oval and round type cylinder compatible.
- Lock case, latch and deadbolt made of zinc plated steel.
- Equipped with auxiliary latch (anti card system) to prevent unwanted intrusions.
- Scandinavian standard strike plate available for an optimal installation.

FINISHES:

ZP

TECHNICAL CHARACTERISTICS :

- Axe distance 105mm.
- Compatible with Scandinavian oval and round type cylinder.
- Round front plate available.
- 8mm square spindle.
- Turning angle 33°.
- Backsets available 50mm.
- Front plates available: 22mm.

HANDING:

- Handed lock, not reversible.

TECHNICAL DRAWING:

OPERATIONS AND FUNCTIONS:

- Intelligent integrated detectors for deadbolt and door position to monitor the status of the door without any additional hardware or fitting.*
- Detection of intrusion alarms.*
- Opened and closed status of doors through SALTO Wireless technology.*
- Optional integrated electronic privacy detector for door/room status real-time monitoring.*
- Anti-panic safety function: In locked position, turning the inside handle retracts auxiliary latch and deadbolt simultaneously.
- Mortise lock available with or without deadbolt for additional security.
- The handle retracts the latch to normal position.

CERTIFICATIONS:

* Depending on the model

EUROPEAN MORTISE LOCK

LE7S | DIN EUROPEAN MORTISE LOCK

The SALTO XS4 LE7S is a DIN compatible mortise lock that offers a wide range of operations and functions possibilities to improve access control with a reliable locking solution.

It includes integrated electronic detectors* to monitorize in real-time the door status, providing an easy to install solution without any additional hardware or drilling needs.

FEATURES:

- DIN compatible mortise lock case, according to DIN 18251.
- Suitable for XS4 Euro standard escutcheons and electronic cylinders.
- High resistance by use of high quality materials.
- Lock case, latch made of steel.
- Equipped with auxiliary latch (anti card system) to prevent unwanted intrusions.
- Different backsets.
- Optional asymmetric front plate for rebated doors.
- Includes standard strike plate and dust box for an optimal installation.
- Requires no extra drilling.
- Strike plate and dust box included.

FINISHES:

TECHNICAL CHARACTERISTICS:

- Axe distance: 72mm.
- Compatible with Euro profile mechanical cylinders.
- Round or squared front plate available.
- 8mm or 9mm square spindle.
- Turning angle: 23°.
- Backsets available: 55mm, 60mm, 65mm and 70mm.
- Front plates available: 20mm and 24mm.

HANDING:

- Reversible latch with antifriction for more convenient and reliable function.
- Optional asymmetric front plate for rebated doors.

TECHNICAL DRAWING:

OPERATIONS AND FUNCTIONS:

- Intelligent integrated detectors for deadbolt and door position to monitor the status of the door without any additional hardware or fitting.*
- Detection of intrusion alarms.*
- Opened and closed status of doors through SALTO Wireless technology.*
- Optional integrated electronic privacy detector for door/room status real-time monitoring.*
- Anti-panic safety function: In locked position, turning the inside handle retracts auxiliary latch and deadbolt simultaneously.
- Mortise lock available with or without deadbolt for additional security.
- The handle retracts the latch to normal position.
- 1 turn thumbturn full projection.

CERTIFICATIONS:

* Depending on the model

EUROPEAN MORTISE LOCK

LE8P | EUROPEAN MORTISE LOCK

The XS4 Euro lock is a mortise lock with latch projection which means the latch is automatically projected and deadlocked when the door is closed. This mortise lock is suitable for all kinds of wooden doors, whether it's a hotel room, office or warehouse door, etc. The new latch projection function increases security by making it impossible to gain access by using plastic cards.

For additional security, SALTO also offers the option to order this lock with a deadbolt.

FEATURES:

- European mortise lock case.
- Suitable for XS4 Euro standard escutcheons and electronic cylinders.
- High resistance by use of high quality materials.
- Lock case, latch and deadbolt made of steel.
- Different backsets.
- Strike plate and dust box not included.

FINISHES:

TECHNICAL CHARACTERISTICS:

- Axe distance: 85mm.
- Compatible with Euro profile mechanical cylinders.
- Round or squared front plate available.
- 8mm square spindle.
- Turning angle: 28°.
- Backsets available: 50mm, 60mm and 70mm.
- Front plates available: 20mm and 23mm.
- ANSI front plates available: 27mm and 32mm for ANSI retrofit.

HANDING:

- Reversible latch for more convenience.

TECHNICAL DRAWING:

OPERATIONS AND FUNCTIONS:

- Mortise lock available with or without deadbolt for additional security.
- Mortise lock with self-locking action projection (5mm projection) to prevent unwanted intrusions.
- The handle retracts the latch to normal position.
- Anti-panic safety function: In locked position, turning the inside handle retracts auxiliary latch and deadbolt simultaneously.
- Deadbolt detector option for electronic privacy function.
- Optional integrated detectors for electronic privacy function to monitor the status of the door without any additional hardware or fitting.

CERTIFICATIONS:

EUROPEAN MORTISE LOCK

LE7W | DIN EUROPEAN AUTOMATIC MORTISE LOCK

The XS4 DIN Mortise lock LE7W is an automatic deadbolt projection mortise lock that fits the DIN standards. This mortise lock is secure and robust, as it has an intelligent system that projects the deadbolt automatically when the door is closed to ensure that it is properly locked.

FEATURES:

- DIN mortise lock case.
- Suitable for XS4 Euro standard escutcheons and electronic cylinders.
- High resistance by use of high quality materials.
- Lock case, latch and deadbolt made of steel.
- Equipped with auxiliary latch (anti card system) to prevent unwanted intrusions.
- Different backsets.
- Strike plate and dust box not included.

FINISHES:

IM

TECHNICAL CHARACTERISTICS:

- Axe distance 72mm.
- Compatible with Euro profile mechanical cylinders.
- Round or squared front plate available.
- 8mm or 9mm square spindle.
- Turning angle ca.30°.
- Backsets available 55mm, 60mm, 65mm and 80mm.
- Front plates available: 20mm and 24mm.

HANDING:

- Handed lock, not reversible.

TECHNICAL DRAWING:

OPERATIONS AND FUNCTIONS:

- Automatic deadbolt projection.
- The handle retracts the latch to normal position.
- Anti-panic safety function: In locked position, turning the inside handle retracts auxiliary latch and deadbolt simultaneously.

CERTIFICATIONS:

Certificates of conformity from the lock manufacturer.

EUROPEAN MORTISE LOCK

LE9W | DIN EUROPEAN MORTISE LOCK

SALTO offers different mortise locks suitable for narrow profile doors. The LE9W is a mortise lock compatible with DIN lock cases that offers a high quality product, and also allows use with an automatic deadbolt projection.

FEATURES:

- European mortise lock case.
- Suitable for XS4 Euro standard escutcheons and electronic cylinders.
- High resistance by use of high quality materials.
- Lock case, latch and deadbolt made of steel.
- Different backsets.
- Strike plate included.

FINISHES:

IM

TECHNICAL CHARACTERISTICS:

- Axe distance 92mm.
- Compatible with Euro profile mechanical cylinders.
- Squared front plate available.
- 9mm square spindle (adaptor to 8mm included).
- Turning angle 30°.
- Backsets available 30mm, 35mm, 40mm and 45mm.
- Front plates available: 24mm.

HANDING:

- Reversible latch for more convenience.

TECHNICAL DRAWING:

OPERATIONS AND FUNCTIONS:

- Mortise lock available with or without deadbolt for additional security.
- Automatic deadbolt projection optional for more security.
- The handle retracts the latch to normal position.
- Anti-panic safety function: In locked position, turning the inside handle retracts auxiliary latch and deadbolt simultaneously.

CERTIFICATIONS:

Certificates of conformity from the lock manufacturer.

ANSI MORTISE LOCK

LA1T | ANSI MORTISE LOCK

Specially designed for those doors that need an ANSI mortise lock ANSI A 156.13 Grade 1 and a privacy function with a deadbolt for Hospitality purposes.

It includes integrated electronic detection to monitorize in real-time the door status, providing an easy to install solution without any additional hardware or drilling needs.

FEATURES:

- Grade 1 ANSI mortise lock case.
- Suitable for ANSI standard escutcheons and electronic cylinders.
- High security heavy duty mortise lock for exterior and interior ANSI standard doors.
- Lock case, latch and deadbolt made of steel.
- Equipped with auxiliary latch (anti card system) to prevent unwanted intrusions.
- Includes standard strike plate and dust box for an optimal installation.

FINISHES:

TECHNICAL CHARACTERISTICS :

- Axe distance 62mm.
- Compatible with mortise cylinders 1-1/8".
- Squared front plate.
- 8mm (5/16") square spindle.
- Turning angle 54°.
- Backsets available: 70mm.
- Front plates available: 32mm (1-1/4"x8") and 27mm (1-1/16"x 8").

HANDING:

- Reversible latch for more convenience.
- Adjustable face plate.

TECHNICAL DRAWING:

OPERATIONS AND FUNCTIONS:

- Intelligent integrated detectors for deadbolt and door position to monitor the status of the door without any additional hardware or fitting.
- Detection of intrusion alarms.
- Opened and closed status of doors through SALTO Wireless technology.
- Optional integrated electronic privacy detector for door/room status real-time monitoring.
- Anti-panic safety function: In locked position, turning the inside handle retracts auxiliary latch and deadbolt simultaneously.
- Mortise lock available with or without deadbolt for additional security.
- The handle retracts the latch to normal position.

CERTIFICATIONS:

SALTO SPACE Platform components

SALTO SPACE PLATFORM COMPONENTS

Wireless System Components

Energy Saving Devices (ESD)

Access Control Management Tools

Credentials

SALTO SPACE | PLATFORM COMPONENTS

The SALTO SPACE platform is more than just a locking solution and by combining the locks with other devices, we can reach a level of convenience and performance higher than traditional stand-alone access control systems.

MAIN FEATURES

The XS4 online advanced wireless solution delivers real-time high level security with all the convenience of battery-operated access control.

It's the perfect choice for applications that need an access control system with low power consumption, providing online control without any need to hard-wire.

Simply set up the gateways (which are connected by Ethernet/WIFI to the controlling PC) and Nodes in pre-defined wireless zones and you're ready to go. The battery powered escutcheons and electronic cylinders use built-in low power radio transceivers to communicate with the gateways to create a real-time wireless access control network.

WIRELESS ACCESS CONTROL PLATFORM COMPONENTS:

- **GATEWAY:** The SALTO Gateway is the link between the PC and the wireless network.
- **NODE:** The SALTO Node is a bridge between the gateway and the wireless door lock.

MANAGEMENT TOOLS

The two SALTO SPACE technology platform management tools are the link between the software and the carriers as well as between the software and the locks on the door. To perform routine tasks such as editing new user keys, set up the access control plan, run diagnostics on offline devices, or perform emergency openings in extreme situations and more.

SALTO SPACE PLATFORM COMPONENTS:

- **ENCODER:** The SALTO XS4 encoder is a compact device which reads, encodes and updates carriers.
- **CONTACTLESS PPD:** The SALTO Portable Programming Device is the messenger between the computer and the locks.

ENERGY SAVING DEVICES

The SALTO in-room energy saving device (ESD) helps save up to 65%* of a hotel room or student dorm's electricity consumption. Unlike standard (magnetic stripe) energy savers, only authorized SALTO key cards will switch on the lights.

It is also available in a connected online version, which as well as energy saving, indicates in real-time the presence of guests or staff in a room, logging the information directly into the building management PC.

SMART ENERGY SAVING DEVICES (ESDs):

- **RFID:** Recognizes RFID user's cards and switches on only the electrical equipment they need to do their work.
- **i-BUTTON:** Recognizes user's i-Button keys and switches on only the electrical equipment they need to do their work.

* SALTO statistics.

CREDENTIALS

SALTO carriers are available in a wide range of versions to suit every user's individual needs. Contactless and intuitive to use, you just have to present the carrier at the reader. All carriers are battery free, waterproof, copyproof and also suitable for multi-applications with other systems like T&A terminals or cashless payment systems.

CONTACTLESS IDENTIFICATION KEYS:

- **CARDS:** Contactless RFID cards.
- **FOBS:** Contactless RFID key fobs.
- **BRACELETS:** Contactless RFID bracelets.

BLUEnet WIRELESS GATEWAY

BLUENET GATEWAY | WIRELESS COMPONENTS

The SALTO Gateway is the link between the PC and the wireless network. Completely managed through SALTO ProAccess SPACE software, it collects all the information sent by the escutcheons through the nodes.

TECHNICAL CHARACTERISTICS :

- Frequency range: 2400-2483,5 Mhz
- RF standard: Bluetooth Low Energy (BLE)
- Indoor radio range: 10/15m
- Max output power: 8dBm
- AES 128bits encryption.
- Connection to the LAN Network 10 BASE-T/100 BASE-TX.
- PoE supported IEEE802.3af (12V power adapter optional).
- Can manage several nodes and many locks.
- IP addressing through web explorer available.
- Firmware update via software through Ethernet connection.
- One internal node included.

TECHNICAL DRAWING:

GATEWAY COLOUR:

BLUEnet WIRELESS NODE

BLUENET NODE | WIRELESS COMPONENTS

The SALTO Node is a bridge between the gateway and the escutcheons, where the distance to the escutcheon or where the number of escutcheons that must be linked to the gateway exceeds what is possible with a single Gateway.

TECHNICAL CHARACTERISTICS :

- RF standard: Bluetooth Low Energy (BLE)
- AES 128bits encryption.
- Connection to the GATEWAY BUS 485.
- Powered by the GATEWAY.
- Can manage up to 16 wireless locks.
- Firmware update via software through Ethernet connection.

TECHNICAL DRAWING:

ENERGY SAVING DEVICE

ESD | ENERGY SAVING DEVICE

The SALTO in room energy saving device (ESD) helps to save up to 65%* of a hotel room or student dorms electricity consumption and unlike standard (magnetic stripe) energy savers, only authorized SALTO key cards will switch on the lights. Any other card (frequent flyer, business card etc) or other SALTO cards belonging to other rooms, won't work.

TECHNICAL CHARACTERISTICS :

- Input voltage: 85-265 Volts AC.
- Consumption:
 - 200 mW in rest mode.
 - 1,8 W when activated.
- Relay power cut: 10A.
- Max. section for power and relays contacts connector:
 - Stranded wire section: 12 AWG (2,5mm²).
 - Strip length: 4-5mm.
- Max. section for windows detector connector:
 - Stranded wire section: 16 AWG (0,5mm²).
 - Strip length: 4-5mm.

TECHNOLOGY PLATFORMS:

SALTO SPACE

ID TECHNOLOGIES :

- MIFARE, MIFARE plus, MIFARE Ultralight C, DESFire, DESFire EV1.
- i-Button.

FEATURES:

- Two different finishes for different room styles.
- Two relay outputs.
- Window detector input. If window is left open, the system will switch off the air conditioning.
- Flexible exit time delay by software.
- Modern Blue LED indicator which indicates the location of the device in the dark, and blinks as a courtesy indicator after retrieving the card when leaving the room.
- Available in i-Button and RFID (Mifare, DESfire, Mifare Ultralight).
- Online version available in RFID models.

ENCODER

ECx0EN/ECX0USB | PLATFORM COMPONENTS

The SALTO encoder is a compact device which reads, encodes and updates cards.

It is available in different versions depending on the PC connection (Ethernet or UBS). It also permits automatic key issuing in large and complex properties, enabling users to carry out key assignment without any assistance required from the access control manager.

TECHNICAL CHARACTERISTICS :

- Current required: 12 v/ 500mA (adaptor included).
- Connection to the PC: USB or Ethernet.
- USB encoders do not usually require an external adaptor.

TECHNOLOGY PLATFORMS:

ID TECHNOLOGIES :

- MIFARE, MIFARE plus, MIFARE Ultralight C, DESFire, DESFire EV1.
- Inside Picopass.
- LEGIC Prime and LEGIC Advant.
- HID iCLASS®.
- i-Button.

DESKTOP READER

ECx0DR | PLATFORM COMPONENTS

Created for the Hotel environment, the SALTO desktop reader is designed to read data from the R&W carriers and send it to an external devices, usually a Point of Sale terminal.

TECHNICAL CHARACTERISTICS :

- Configuration by dip switches to control data to be read and the interface with the external device.
- The interface with the external device can be RS232, OMRON and WIEGAND.
- Current required: 12v DC source (included).
- Connection to the external device: 9 pin D-type female connector (to be connected to serial port).
- Data read by the desktop reader: ROM CODE, TRACKS ON KEY, WIEGAND CODE.

TECHNOLOGY PLATFORMS:

ID TECHNOLOGIES :

- MIFARE, MIFARE plus, MIFARE Ultralight C, DESFire, DESFire EV1.
- Inside Picopass.
- LEGIC Prime and LEGIC Advant.
- HID iCLASS®.

PORTABLE PROGRAMING DEVICE

PPDx00 | PLATFORM COMPONENTS

The SALTO contactless Portable Programmer Device (PPD) is the messenger between the computer and the locks such as escutcheons or cylinders. It is used by systems administrator staff to test or program the locks, initialize doors, update locks or collect audit trails.

FEATURES:

- Multilingual interface that facilitates the maintenance operations.
- Initialise doors: Transmits the door's access plan where the lock, reader or cylinder is installed.
- Collect audit trail: Download all the register of events from the locks, readers or cylinders.
- Update locks (door profile & internal clock).
- Door diagnostic.
- Emergency opening.
- Firmware update.
- Auto switch-off.
- Low-battery indication

TECHNICAL CHARACTERISTICS :

- Power source: 3 alkaline batteries - LR03 - AAA 1,5V.
- Membrane keyboard.
- Adaptive brightness to correct screen.
- Connection to lock: cable included or contactless through NFC.
- PC connection: USB.

TECHNOLOGY PLATFORMS:

CARRIERS - CARDS

CREDENTIALS | PLATFORM COMPONENTS

Reusable, contactless RFID smart cards for access control. It provides higher levels of security than traditional mechanical key management and additional applications can be implemented on the same ID user credential.

TECHNICAL CHARACTERISTICS :

- Available in 1 Kbytes / 4 Kbytes of memory
- Available in white, SALTO design and other design (under request).
- Meets requirements for contactless access control and compatible with SALTO Virtual Network data-on-card technology.
- Same size and thickness as a standard credit card.

SALTO SPACE SOFTWARE | ProAccess SPACE

SALTO ProAccess SPACE Software is a powerful web-based access control management tool that enables users to programme access-time zones, manage different calendars and view audit trails from each door. Its user-friendly interface is simple to

set up and configure, giving users the flexibility and control that today's modern access control systems require.

MAIN FEATURES

SERVER OPERATING SYSTEM:

- Windows 7 SP1.
- Windows 8.12.
- Windows 10.
- Windows Server 2008 R2 SP1.
- Windows Server 2012 R2.
- Windows Server 2016 (32-bits & 64-bits).

MICROSOFT .NET FRAMEWORK REQUIREMENT:

- Net Framework 4.6.2. or higher.

HARDWARE REQUIREMENT FOR SERVER:

- Processor: 1 GHz or higher. 32Bits or 64Bits.
- RAM: 4 GB.
- Hard disk space required: 10 GB.
(Aprox., depends on the DB).

HARDWARE REQUIREMENT FOR CLIENT:

- Processor: 1.6 GHz or higher. 32Bits or 64Bits.
- RAM: 1 GB.
- NET framework: V.40.2

HTML5

- Supports all major web browsers like Chrome, Firefox, Edge, and Safari...

SQL DATABASE ENGINE COMPATIBILITY:

- SQL LocalDB (included in ProAccess SPACE software - SQL Server 2012Express)
- SQL Server 2014
- SQL Server 2012
- SQL Server 2008 R2

ACCESS CONTROL FEATURES

USERS & DOORS:

- Maximum number of users per door: 4 million.
- Maximum number of doors per system: 65,000
- User access levels: Unlimited.

CALENDARS & TIME ZONES:

- Calendars in system: 256
- Time tables: 1024
- Timeperiods: 1024

ENERGY SAVING DEVICES

USER FRIENDLY:

- 100% web-based software that facilitates the set-up, routine use and monitoring, as well as any updating and changing of access rights.
- Web-based interface means no need to install the software on all client PCs.
- Easy installation process that includes a powerful SQL engine. Database protected by SQL authentication or windows-based authentication.
- Multi-language and configurable interface makes it easy to adjust the interface to the specific needs and security level of each operator, including operator password protection for higher security.
- Online event monitoring through web browser permitting real-time visibility of all events at online doors.
- Incorporate user photos to facilitate easy and fast identification of users at online access points.
- Easier set-up of the XS4 2.0 Controller inputs and outputs through a userfriendly wizzard template.

SECURE:

- Systems's auditor registers changes done by operators.
- Interface alerts to be aware of potential conflicts on the setup of the access plan or changes.
- Easy to upgrade to additional features to keep in-line with an installation's requirements.

FLEXIBLE:

- Also, an update of the server PC means that all client PCs are also updated.
- Can be managed or operated from different workstations simultaneously without risk of database corruption.
- Possibility of multi-display using different web screens.
- SALTO ProAccess SPACE software can also be used on Windows-based tablets.

SMARTPHONE-BASED:

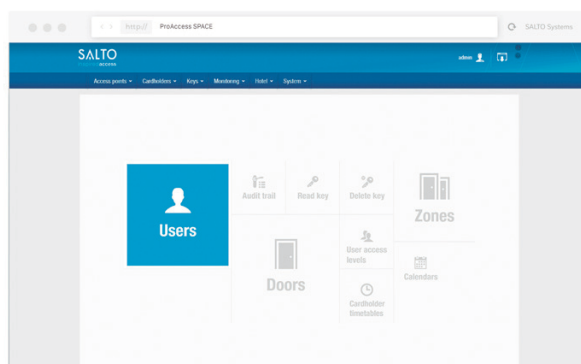

- JustIN Mobile permits access control users and hotel guests to use their BLE-enabled smartphone as their credential.
- JustIN mSVN permits users to use their NFC-enabled smartphone to update their credentials remotely.

PROACCESS SPACE | MANAGEMENT SOFTWARE

SALTO Systems' new software, ProAccess SPACE, brings together a superior level of flexibility and functionality with an easy to use, web based interface and logic that enable the straightforward management of SALTO access control installations.

ProAccess SPACE lets users choose and pay for just the features and functions they need now, with the flexibility to upgrade accordingly in the future as their needs grow.

MAIN FEATURES

SIMPLE BUT POWERFUL IN SYSTEM SCOPE:

SALTO ProAccess SPACE gives you all the potential of one complete access control software package, whatever the size of site.

- 4,000,000 users.
- 65,000 doors, lockers, controllers...
- Unlimited user access levels.
- 1,024 zones.

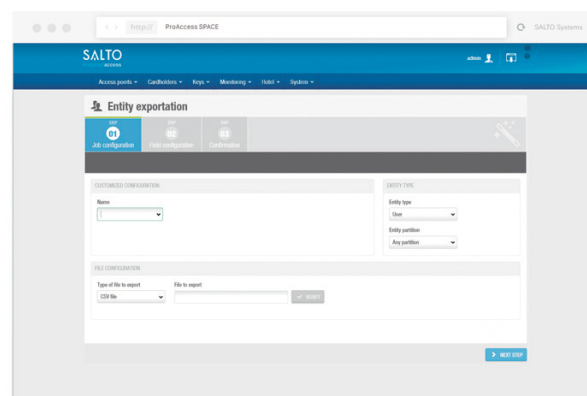

THE SALTO HOST INTERFACE PROTOCOL INTERFACE (SHIP)

The SALTO Host Interface Protocol enables users to integrate their SALTO access control system to other systems, i.e., CCTV, fire alarm, traditional access control, etc., all via the same ProAccess SPACE software.

THE POWER OF AN SQL MOTOR ENGINE DATABASE MADE EASY:

Allows management of peripheral devices from your web browser, even on client workstations without any additional configuration, bringing more flexibility and convenience to your management routines.

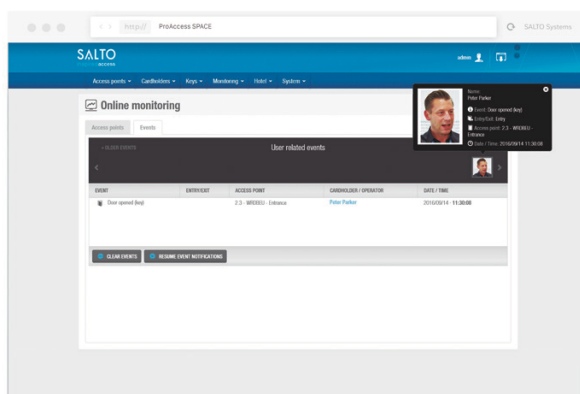

- Reliable and secured database infrastructure (SQL authentication or Windows-based authentication).
- No complex installation or need for advanced IT department or knowledge.
- No expensive licenses.
- Suitable for high security installations that require compliance with the highest IT standards.
- SSL protocols to warranty the security.
- Encrypted communication between the software and SALTO devices.

MOBILE ACCESS CONTROL WITH SALTO JUSTIN MOBILE:

SALTO's new ProAccess SPACE software enables users to the benefit of SALTO Mobile technology through JustIN mSVN or JustIN Mobile. Both of these mobile solutions bring better security and usability to end users as well as system managers.

End users gain convenience and productivity without sacrificing security, while facility managers distinguish their property with cost-effective solutions that clients truly value.

USER-CENTERED INTERFACE DESIGN:

SALTO ProAccess SPACE has been designed to meet the needs of all of our users, providing an efficient tool that make their daily tasks easier, faster and more productive.

- More intuitive and user-friendly interface, with one window from which an operator manages all the tools needed.
- Multi-windows interface.
- Multi-language interface.
- Interface alerts of potential conflicts in the setup of access plan or changes.

COMPATIBLE WITH MULTIPLE BROWSERS AND OS:

SALTO ProAccess SPACE software client interface works with Microsoft Explorer, Safari and Firefox and can also be used with Windows tablets. Just a Silverlight plug-in needs to be installed and that's it.

CUSTOMISE OPERATOR PROFILES, INCLUDING SECURITY LEVELS:

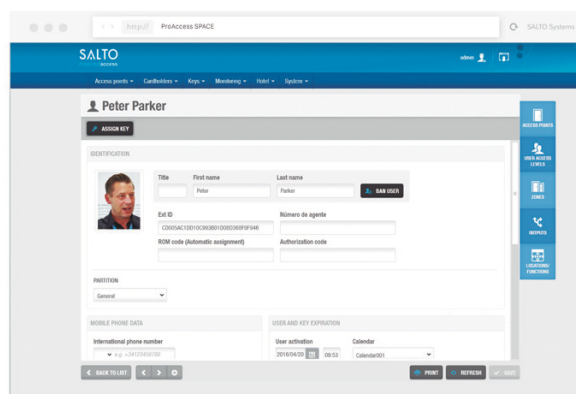

Operators are in control of the access plan management, so that's why ProAccess SPACE has a lot of functionality around operator management.

- Customization of the operator profile and operator workspace.
- Operator password protection for a higher security.
- System auditor to track what changes have been done by which operators.

MULTI-WORKSTATION WITHOUT MULTI-STATION DESKTOP INSTALLATION:

SALTO's web-based interface means the system can be managed or operated from different workstations simultaneously without risk of database corruption.

No need to install the software on all operator PCs. Simply install SALTO ProAccess SPACE SERVICE in one server or computer, then give access to other authorised computers inside the network.

BUY EXACTLY WHAT YOU NEED ONCE, AND EASILY ADD ON A LA CARTE AS YOUR REQUIREMENTS GROW:

SALTO ProAccess SPACE Software builds upon the experience and functionalities of ProAccess while adding an impressive mix of new capabilities and usability.

- Licensing system allows adding features and creating a tailor-made system, depending on your needs.

UPGRADABLE:

Migrating from existing SALTO software is straightforward, no matter the version of ProAccess or HAMS currently in use.

You can upgrade while maintaining all the content of the access plan, users, doors, audit trail, etc.

PROACCESS SPACE | MANAGEMENT SOFTWARE

ProAccess SPACE lets users choose and pay for only the features and functions they need now, with the flexibility to upgrade accordingly in the future as their needs grow.

With the SALTO ProAccess SPACE perpetual license system, you pay once for the features you need, and if new needs arise, you can easily and quickly upgrade your license, increasing the functionality and with the convenience you need.

MAIN FEATURES

Interfacing

EVENT STREAM:

The Event Stream option generates real-time notifications to third party systems. The idea is to filter the audit trail and send the selected events so that the order system can process the received information and perform a real-time action.

Feature included in: SPAONLINE, SPAIDSYS and SPAPART packages.

SHIP INTEGRATION:

The SALTO Host Interface Protocol enables users to integrate their SALTO Access Control system with other systems i.e., CCTV, fire alarm, traditional access control, etc., all via the same software.

Function is only available as a separate add-on and is not included in any predefined package.

SALTO MOBILE USERS:

SALTO Mobile permits registered users to use their BLE-enabled smartphone as their credential, or their NFC-enabled smartphone to serve as a remote updating point to keep their access rights always up to date. ProAccess SPACE software permits the specific selection of which mobile solution -- JustIN Mobile or JustIN mSVN -- is appropriate for each individual user.

Function is only available as a separate add-on and is not included in any predefined package.

OPERATORS PROFILE:

Each system operator can customize the look and feel of its own GUI by pre-defining the language, which encoder is to be used, column sorting etc... allowing a more efficient multi-user environment.

Monitoring

ONLINE MONITORING:

SALTO ProAccess software enables you to monitor in real-time not just battery status or if an update is needed, but also who accessed what door and when, if a door has been left open, intrusions, etc. Total control, all in real-time.

Feature included in: SPABASIC, SPAONLINE, SPAIDSYS and SPAPART packages.

LIMITED OCCUPANCY:

Using the Limited occupancy feature, you can control the maximum number of authorised users. The system will automatically deny access once set occupancy levels are reached, re-granting access if or when the limits are reset.

Feature included in: SPAONLINE, SPAIDSYS and SPAPART packages.

ROLL CALL:

Through the Roll Call function, you can track where users are in different roll call areas in real-time.

Feature included in: SPAONLINE, SPAIDSYS and SPAPART packages.

GRAPHICAL MAPPING:

Graphical mapping is a visual interface that permits monitorization of users' access to online wired and wireless access points in real-time throughout the building layout.

Function is only available as a separate add-on and is not included in any predefined package.

Advanced security

LOCKDOWN:

SALTO ProAccess SPACE software enables users to make an emergency lockdown of a property in the event of a security incident.

Feature included in: SPAONLINE, SPAIDSYS and SPAPART packages.

AMOK:

SALTO AMOK electronic escutcheons have a built-in card reader on the inner escutcheon that enables users to activate the AMOK function mode in order to lockdown a room quickly. Only authorized users with AMOK privileges on their access plan can activate it.

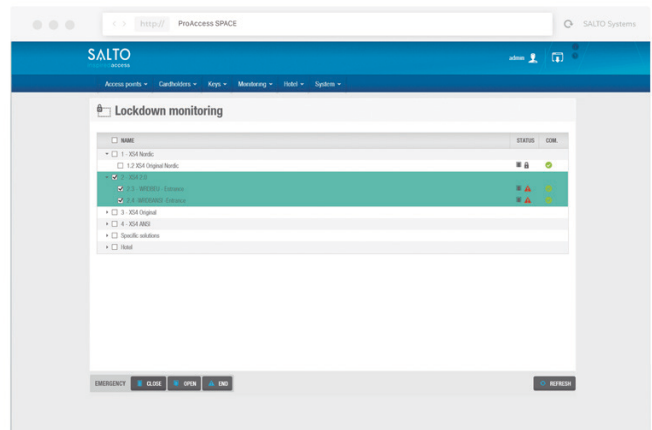

Feature included in: SPABASIC, SPAONLINE, SPAIDSYS and SPAPART packages.

ANTIPASSBACK:

The Antipassback feature establishes a specific sequence in which access cards must be used in order for the system to grant access.

Feature included in: SPAONLINE, SPAIDSYS and SPAPART packages.

AUTOMATIC KEY ASSIGNMENT:

Automatic key assignment is a tool that enables the encoding of key cards directly via a wall reader at the main point of access. This can be done the first time a user presents their card, saving time and the need to queue for card validation.

Feature included in: SPAONLINE, SPAIDSYS and SPAPART packages.

EVENT ENGINE MODULE:

SALTO ProAccess SPACE can now manage specific event-triggered actions and alarms. The Event Engine's intuitive wizard permits programming of any event audit trail or any event-triggered action through the CU42xxx inputs to automatically perform defined actions, such as activating CCTV recording, sending e-mail alert notifications, activating lockdown, etc.

An event can be scheduled or triggered by a user, user group or door event through an audit trail event or XS4 2.0 Controller inputs.

Function is only available as a separate add-on and is not included in any predefined package.

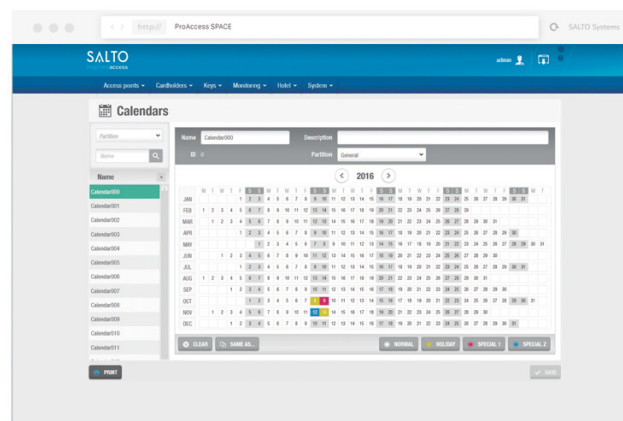

Administrator

MATRIX FUNCTIONS AND LOCATIONS:

The combination of users to doors and their different functions can cause occasional keying problems when designing the access plan. The Matrix Access Function simplifies and streamlines the link between users and doors, making access planning simple and straightforward.

Function is only available as a separate add-on and is not included in any predefined package.

VISITOR MANAGEMENT:

The Visitor module enables you to issue visitor cards for a few hours, a few days or for something in between, and all with a built-in cancellation date that will disable the credential automatically.

Feature included in: SPAIDSYS and SPAPART packages.

BADGING:

The SALTO badging module enables users to create templates for card credentials via information from the user's access plan data. The cards can be customized both internally and externally.

Feature included in: SPAIDSYS and SPAPART packages.

LOCKER LOCKS:

As part of the SALTO platform, our XS4 locker locks can also be managed through ProAccess SPACE software. This provides an impressive range of options including free assignment mode, family mode, subject to calendars, etc.; almost unlimited possibilities.

Feature included in: SPABASIC, SPAONLINE, SPAIDSYS and SPAPART packages.

PARTITIONS:

Department operator enables properties to be managed independently but while retaining shared access privileges. Individual buildings can be run by their own managers, controlling their own user's access rights.

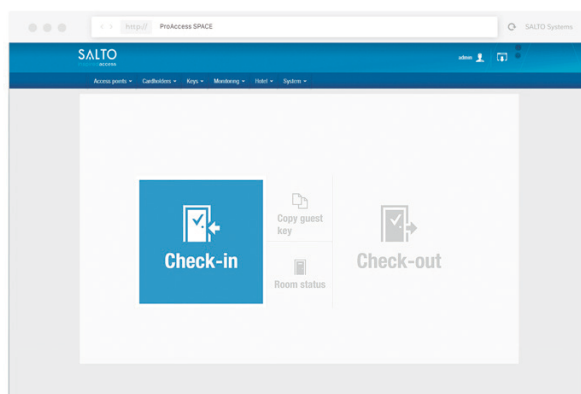

Feature included in: SPAPART packages.

PROACCESS SPACE | FRONT DESK MANAGEMENT SOFTWARE

For the Hospitality market, SALTO has developed specific Add-ons which allow hotel clients to easily control all their access and guest management needs with one easy-to-use system. It suits hotels of all types and sizes.

These plus other key hotel features make it easy to control all the offline and online guest rooms and back-of-house doors from one central location.

HOSPITALITY ADD-ONS

MOBILE ACCESS (BLE):

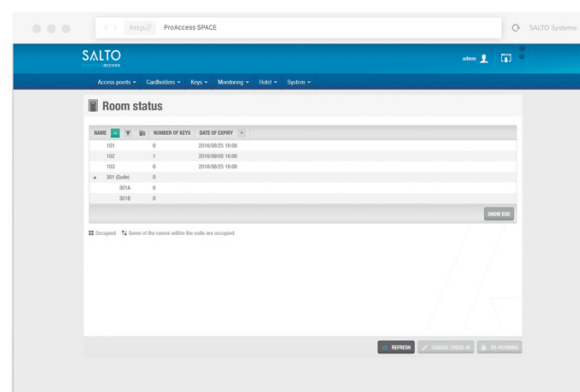

Provide your guests with a hotel experience they value and want to repeat by facilitating their check-in experience without sacrificing their security and comfort.

With ProAccess SPACE it's easy to incorporate mobile access control. Visiting the front desk will soon be a thing of the past with SALTO's revolutionary innovation in guest experiences. Guests can now access their hotel room and bypass the front desk by using their smartphone as a room key; checkout without having to return keys; and extend their stay simply by requesting an extension via their phone. Can be used along with or as a replacement of RFID credentials.

GROUP CHECK-IN:

When guests arrive at a hotel, they want to check in and get started on what they came to do: hang back and relax, or start in on work. That means that all the steps of the check in process need to work flawlessly, from issuing the guest card to guests being able to seamlessly access their room, pool area, spa or other amenities.

With ProAccess SPACE a quickly and fast group check-in is possible, which allow hotel clients to easily control all their access and guest management needs with one easy-to-use system.

REAL-TIME RE-ROOMING / EXTENDED STAY:

Display what's happening around your hotel and take control from the guest room to the rest of your property access points (Back-of-house and guest service doors) in one single system providing security and reliable access control 24/7 that covers the entire property.

SALTO ProAccess SPACE allows the guest to extend their stay or request a room change without having to visit reception, almost instant re-rooming is enacted and the guest's access credentials will give him immediate entry to his new room with better views.

PROPERTY MANAGEMENT SOFTWARE (PMS)

ProAccess SPACE is compatible with leading property management software (PMS) such as Micros FIDELIO, New Hotel, Protel, Infor etc. to validate guest registrations, guide the guest through the check-in/out process and generate guest room keys. Can also be used to manage SALTO Intelligent Energy Saving Devices (ESD).

SOFTWARE PACKAGES GUIDE INFORMATION

SALTO's ProAccess SPACE web-based software brings a new level of powerful flexibility to access control so that users can order the functionalities that they most need and upgrade accordingly as a system and needs grow. And in addition to the abundance of important new functionalities, SPACE also has a modern interface

that is more user-friendly to help users find and operate the functions they want to use as quickly and intuitively as possible.

SALTOKS.com

SALTO KS | CLOUD-BASED LOCKING SOLUTION

The SALTO KS - Keys as a Service - platform is more than just a locking solution and combining the locks with other devices we can reach a level of convenience and performances higher than the traditional stand-alone access control systems.

IQ

The IQ is the center of the SALTO KS solution. It connects your wireless locks to the SALTO KS cloud. Mount the IQ with the included mount bracket, plug it into the power outlet and activate it in your saltoks.com account.

The SALTO KS Repeater allows you to extend the distance between the SALTO KS IQ and your locks. IQ and locks can be 1 – 10 meters apart but each time you add a Repeater you extend this by 10 metres. You may add 3 repeaters in between an IQ and a lock which means that maximum distance between door and IQ can go up to 40 meters.

TAGS

The SALTO KS tag is the smallest of the SALTO KS family but highly secure and just as good-looking. The heart of the tag holds the most secure RFID chip available in the market to make sure that it is impossible to duplicate the tag ID.

MOBILE APP

Manage SALTO KS on-the-go! Available for IOS and Android Phones the SALTO KS App enables you to manage the access control system when you are on the go and in real time. It offers those features that you want to be able to do whenever and wherever.

SALTOKS.COM

The SALTO KS account allows you to define who goes where and when in a building. Create profiles for users, assign or block tags, define which doors they may enter on which days, at which times.

IQ

SALTO KS IQ | CLOUD-BASED LOCKING SOLUTION

The IQ2.0 uses 2G, 3G and 4G cellular connectivity to communicate with the SALTO cloud. Also available in WiFi or POE version and always available through Ethernet connection. The IQ2.0 communicates with SALTO KS access points via ZigBee/Bluetooth.

FEATURES:

- Wireless radio frequency based on IEEE 802.15.4 at 2,4Ghz.
- AES 128bits encryption.
- Online in real time communication.
- Connectivity in +100 countries.
- Matching adapter included with 3 meter cable.
- Over the Air (OTA) firmware updates.
- TLS secured communication.
- No data outage risk through best roaming guaranty.
- Connects up to 16 doors per SALTO KS IQ.
- Unlimited SALTO KS IQs per account.
- Cellular connection 2G, 3G, 4G.
- Local Access Management (LAM).

TECHNOLOGY PLATFORMS:

SALTO KS

TECH SPECS :

Operation conditions:

-Temperature: 0-40°.

2,4Ghz RF Characteristics:

-Frequency Range: 2405-2480Mhz (ISM band).

-RF Standard: IEEE 802.15.4.

-Indoor Radio Range: 10/15m.

GPRS RF Characteristics (SALTO KS IQ only):

-Frequency bands:

- EGSM-GPRS 900/850 radio.

- GSM-GPRS 1800/1900 radio.

- EGPRS 900/850 radio.

- EGPRS 1800/1900 radio.

- GSM/GPRS class 10 and EGPRS class 10 capable.

Power supply characteristics

(Only for use with SALTO KS's power supply)

- Input voltage: 12v.

- Max current: 800 mA.

PRODUCT ATTRIBUTE:

- **It always fits.** The SALTO KS IQ bracket adapts to your situation. Mount it horizontally or vertically, whatever suits best.
- **LED notification.** This means that besides through home.saltoks.com messaging also a visual notification on the device itself will inform you about the well-being of your SALTO KS system. Turn off "Heartbeat" green light on IQ if you prefer.
- **Extend distances.** Add up to 3 SALTO KS Repeaters in line and a maximum of 6 for each SALTO KS IQ between your access point and the SALTO KS IQ.

TAGS

SALTO KS TAGS | CLOUD-BASED LOCKING SOLUTION

The SALTO KS tag is the smallest member of the SALTO KS family but highly secure and just as good-looking. The heart of the tag holds the most secure RFID chip available in the market to make sure that it is impossible to duplicate the tag ID.

FEATURES:

- SALTO KS tags meet ISO Standards
- Battery-free operation.
- Choice of 5 colours.
- Waterproof
- 13,56 Mhz
- Single SALTO KS tag works for multiple SALTO KS systems.
- Secure, copy-proof data carrier for high security.
- Strong, ergonomic design for long life.
- High resistance to variations in weather conditions.
- Comfortable to use - can be carried on a key ring alongside traditional keys.
- SALTO SVN compatible.
- Dual tag available. EM4200 125 kHz chip - Read Only.

TECHNOLOGY PLATFORMS:

COLOURS:

ID TECHNOLOGIES

- DESFire EV1 4K (4096 bytes).
- DESFire EV1 + SVN compatible.
- Dual Tag available: DESFire EV1 + EM4200 125 kHz chip.
- Dual Tag + SVN compatible.

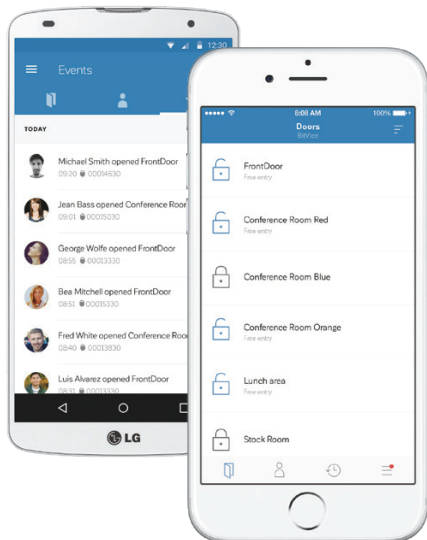

PRODUCT ATTRIBUTE:

- **Adding tags.** To add tags just select one of your doors and use the secured 2 minute window to present them at the lock.
- **Blocking tags.** In case someone has lost or did not return one of your tags you simply block them via My-SALTO KS. Blocking is real-time without any delay and when you retrieve a tag you simply unblock it.
- **Security.** You can add any SALTO KS tag to your system but once they are added, they belong to that system. The RFID technology used is the same as in many governmental and military applications and uses AES algorithm.
- **1 Tag : 5 colors.** No one is alike and SALTO KS understands. That's why the tag will be available in 5 different colors.

MOBILE APP

SALTO KS APP | CLOUD-BASED LOCKING SOLUTION

Manage SALTO KS on-the-go! Available for IOS and Android Phones the SALTO KS app enables you to manage the access control system when you are on the go and in real time. It offers those features that you want to be able to do whenever and wherever.

PRODUCT ATTRIBUTE:

- **Remote Opening.** One of the cool but really functional features of SALTO KS is the remote opening of doors with secure one-time-password technology. You may not use it everyday but when you need it, you will be happy it's there.
- **Multiplatform.** You can manage SALTO KS cloud-based access control from any device – phone, tablet, pc - all you need is an online device with an Internet connection.
- **Reliability.** Ensuring real-time monitorization and solving immediately any issues caused.

MOBILE APP AVAILABLE FROM STORE:

WEB APPLICATION

SALTOKS.COM | CLOUD-BASED LOCKING SOLUTION

The SALTO KS account allows you to define who goes where and when in a building. Create profiles for users, assign or block tags, define which doors they may enter on which days, at which times.

PRODUCT ATTRIBUTE:

- **The Dashboard.** Saltoks.com always gives you up-to-date information and remote management of all users and access points through the dashboard.
- **Access rights, who, where, when...** What no conventional key can do is changing access rights on the fly. Saltoks.com gives you the opportunity to individually determine who enters when and where. And if you want to change that just log-in, make your changes and it's done. No updating of tag or access point required. Have you ever been able to do this with your current lock?
- **Messaging.** Saltoks.com always gives you up-to-date information and remote management of all system components through the dashboard. It's all there: door status, last entries and events, alarms and the possibility to open and lock doors remotely.
- **Security.** SALTO understands the importance of security. That's why we have incorporated state-of-the-art security measures in all our components and more important, we will keep updating that permanently. Not always visible but always there.
- **Multiplatform.** You can manage SALTO KS from any device – phone, tablet, pc - all you need is an online device with an Internet connection.

SALTO KS CONNECT

Camera Manager

CAMERA MANAGER

SALTO KS CONNECT | CLOUD BASED VIDEO SURVEILLANCE

Eagle Eye CameraManager is built for the cloud, providing reliability and redundancy. It's ideal for servicing multiple locations and provides access to live and recorded video, from one or more locations, with a single login. And fully integrated in the SALTO KS apps.

TECH SPECS:

INDOOR MODEL:

- HD video 1080p
- Motion, infrared and sound detections
- Microphone
- Wide angle view (95°)
- Night view up to 10m
- SD card
- Wifi

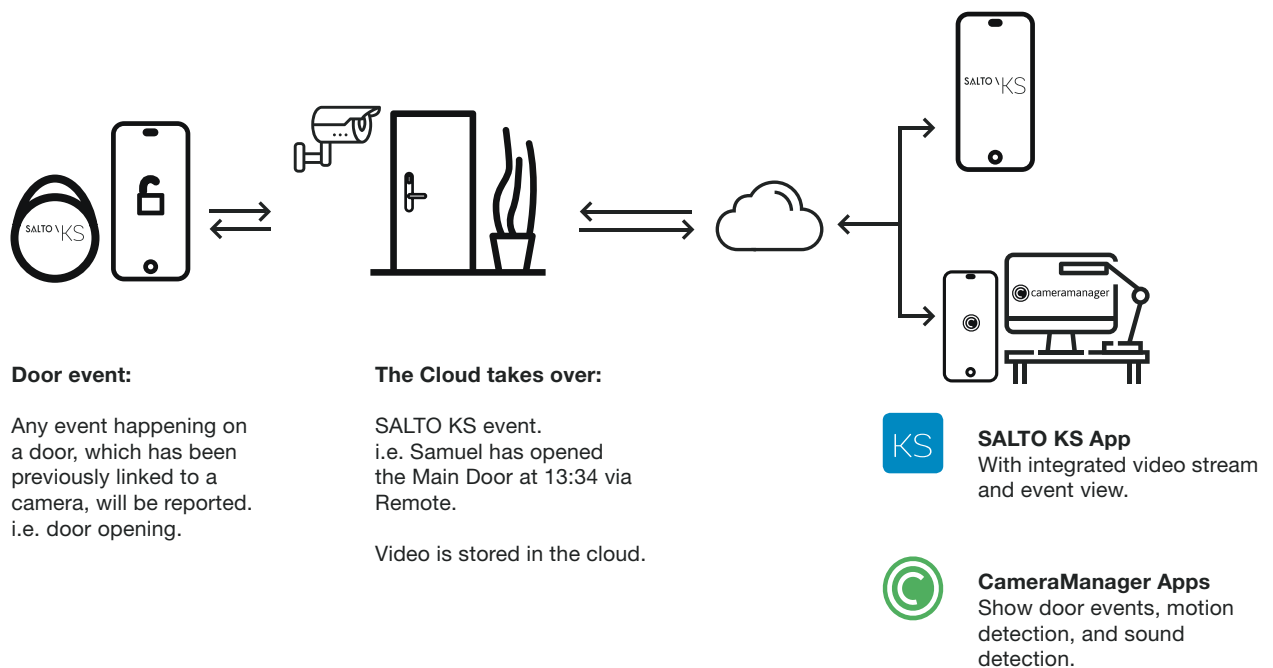

OUTDOOR MODEL:

- IP67 outdoor
- HD video 1080p
- Motion detections
- Power over ethernet
- Wide angle view (93°)
- Night view up to 30m

PRODUCT ATTRIBUTE:

- **Easy set-up:** Add cameras in two steps.
- **Scheduling:** Record when needed.
- **Notifications:** Know what's up.
- **Live Streaming:** See who's in front of the door.
- **Event Recordings:** Look back in time.

HOW DOES IT WORK?

TECHNOLOGY PLATFORMS:

BUILD YOUR OWN DOOR

CUSTOMIZE YOUR ELECTRONIC DOOR LOCK

Select an electronic lock model, door type and customize your SALTO door lock with a range of colours, finishes and handle options.

This innovative tool will allow for complete visualization and customization of the locking solutions chosen by the user. By accessing the web page, the user is able to select the door lock model online to configure and create a customized door by personalizing everything.

SALTO continues to innovate by launching a unique tool for the access control industry.

<https://mylock.saltosystems.com>

CHOOSE YOUR ELECTRONIC LOCK MODEL:

Choose your favorite electronic lock model (ANSI, Euro or Scandinavian standards) to create your customized door and personalise everything.

CHOOSE YOUR DOOR TYPE AND SELECT A HANDLE DESIGN:

Choose a door type, finish, handle design and lockset finish that match your door.

DOWNLOAD AND SAVE YOUR SETTINGS:

Once the door configuration is complete, you can store and compare it against previously-configured door lock models or save it as a PDF.

Send us your selection, ask us a question or just contact us for a demo.

ABOUT US

SALTO Systems revolutionized access control with the introduction of the SALTO Virtual Network SVN data-on-card technology and the battery-operated wire-free electronic lock range in 2001. For nearly 20 years SALTO has been synonymous with innovative solutions, including stand-alone, cloud-based and mobile applications, that set new standards in security, manageability, flexibility and design that bring real-world benefits to virtually any type of door. Across a broad range of industries and applications, SALTO is widely recognized as a global market leader in electronic access control solutions.

OUR COMMITMENT TO BEST SERVICE

To ensure we deliver the very best possible service, SALTO needs to be where our customers are.

This is why SALTO has its own offices in Australia, Belgium, Canada, China, Colombia, Czech Republic, Denmark, France, Finland, Germany, Hon Kong, Italy, Mexico, The Netherlands, Norway, Poland, Portugal, Singapore, Slovak Republic, Spain, South Africa, Switzerland, UAE, UK and USA.

Our office network will continue to grow to make certain that SALTO provides unrivalled levels of warranty support and service.

SALTO PARTNER NETWORK

As well as our SALTO offices, we also have a specialized partner network in over 90 countries.

These offices count on expertise from specialists in the security industry who share the same values of enthusiasm and commitment as SALTO, and who are ready to provide customers with the very best support and service.

SALTO's official partners are all security specialists.

THE ACCESS CONTROL PARTNER YOU CAN RELY ON

At SALTO we have all key activities in-house, from product conception and design, right up through the final manufacturing and shipping processes.

This continuity allows SALTO to warranty our products to the highest quality standards, thereby giving our customers the flexibility, delivery and peace of mind they require.

At SALTO, we believe this type of direct control best enables us to continue to develop, launch and support the most effective access control solutions available.

SALTO is ISO 9001:2015 and ISO 14001 certified, demonstrating that rigorous quality and environmental management systems are in place to ensure the design, development and manufacture of our electronic access control products always strive to achieve the highest possible standards in quality, as required by our customers.

SOCIAL RESPONSIBILITY (CSR)

SALTO Systems takes very seriously its responsibility to play a leading role in the social development of the local community around its many offices throughout the world.

In 2005 this effort was channelled into creating the free2move.org social initiative that works to promote handicapped sport as a means of achieving greater social integration, and thereby defying the assumption that people with a physical disability cannot lead a life of excellence and achievement.
